STUDENT AND PARENT CONCERNS

(For the purposes of special educational decision-making, parent shall mean father, mother, legal guardian, person acting as a parent of the child, foster parent, or an educational surrogate parent appointed in accordance with federal law.)

What concern(s) do you want this IEP to address?

Student Concerns (2025-2026):

did not express any concerns about his educational programming.

Parent Concerns (2025-2026):

Parent Vision

We envision living a joyful, safe, and dignified life with the greatest level of independence possible, supported by the individualized services and care he needs to truly thrive. requires appropriate support in all identified areas of concern, provided in a setting that fosters safety, growth, inclusion, and meaningful engagement. We want him to have access to robust, life-enriching programs and experiences, as well as meaningful opportunities for social connection, employment, volunteer work, and active participation in his community.

As approaches age 22 in January 2027, we seek a proactive, coordinated, and seamless transition to adult services that protects his well-being, preserves his dignity, and promotes long-term success. This transition should emphasize meaningful planning, continuity, and stability so that can enjoy a rich quality of life without gaps in services that could lead to regression of skills or a decline in his overall well-being. It is also important that this process provide guidance and support to his family.

Our goal is for to transition into a well-run, healthy, and thriving group home setting that is fully equipped to meet his needs and is located as close to Franklin as possible, so that he can remain closely connected to his family, community, and the people who know and love him best.

Parent Concerns Statement

Our primary concern is ensuring that is being meaningfully prepared for a safe, dignified, healthy, and connected adult life. As he gets closer to adulthood and his transition to adult services, we want to ensure that his educational program is addressing not only academics and current functioning, but also the real-life skills, safety awareness, communication abilities, self-advocacy, and daily living needs that will determine his long-term quality of life.

Safety

continues to need substantial instruction, supervision, and practice in critical safety skills. We are concerned about his ability to safely navigate parking lots, street crossings, and other community settings. His fixation on children and clothing creates significant challenges that can make community access difficult and, at times, unsafe. We are also concerned about his ability to remain home alone safely for even short periods of time, to recognize emergencies, and to respond appropriately in urgent situations. In addition, we are deeply concerned about 's vulnerability to abuse, exploitation, or mistreatment due to his limitations in communication, social understanding, judgment, and self-protection.

Daily Living Skills

continues to need direct instruction and support in daily living and self-care skills in order to reduce dependence and increase functional independence. Areas of concern include initiation of tasks, showering, brushing teeth, applying lotion, dressing appropriately for the weather, and using hygiene routines consistently and thoroughly. He also needs support in learning to manage toiletries and personal care supplies appropriately, including the placement and use of towels, rinsing his toothbrush, and consistently using his own supplies. Bathrooming remains a major area of concern, including bowel movements in his clothing, on his finger, and on bedding, which impacts hygiene, dignity, health, and independence. We are also concerned that is not yet able to independently prepare even a few simple meals such as a sandwich, chicken nuggets, or tater tots. He needs meaningful instruction in functional life skills that will support a more independent and dignified adult life.

Community Access and Functional Independence

We want _____ to build the skills needed to participate meaningfully and safely in the community. This includes practicing functional community activities such as dining out, going to the movies, bowling, and navigating public spaces appropriately and safely. We are also concerned about his ability to report on his day and communicate events that have happened, which is essential for safety, accountability, relationship-building, and overall quality of life. Without this skill, it becomes much harder for family and future caregivers to understand his experiences, preferences, concerns, and needs.

Post-22 Transition and Adult Life Planning

A major parent concern is what _____'s life will look like after age 22. We need transition planning that is concrete, proactive, and centered on the realities of adult life. Our concerns include where _____ will live, what access he will have to meaningful activities and community experiences, who will support him in planning his day, and how transportation to and from activities will be arranged. We want the team to focus on preparing _____ for a life that is not simply safe, but also purposeful, enriching, stable, and connected.

Social Development

_____ currently does not have friendships that he is able to initiate, maintain, or navigate independently. Although he has many recreational and leisure interests, he lacks the friendships, social connections, and support needed to explore and enjoy those interests alongside peers. This is a significant concern because social connection, belonging, and companionship are important parts of long-term emotional well-being and quality of life. We want to see intentional support in developing social communication, relationship-building, shared leisure opportunities, and the skills needed to engage more meaningfully with others.

Communication and Self-Advocacy

_____ has difficulty expressing when he feels upset, threatened, confused, or wronged. When dysregulated, he may posture, push, or hit, and he often lacks the language and self-regulation skills to communicate what is bothering him in a safe and effective way. Instead, he may repetitively and aggressively state what he wants without being able to explain the underlying issue. We are concerned that _____ needs much more support in self-advocacy, emotional regulation, problem-solving, and functional communication so that he can express discomfort, ask for help, set boundaries, and resolve problems without aggression.

Healthy Living

We want _____ to be supported in developing lifelong habits around health and wellness. This includes access to physical fitness, strength-building opportunities, nutritious meals and snacks, and increased independence in self-care related to hygiene and bathrooming. These areas are directly connected to his physical health, confidence, dignity, and overall well-being.

Family and Natural Supports

_____ has very few friends or extended family members who are actively involved in his life. This increases our concern about his long-term support system and highlights the importance of building skills, relationships, and community connections now. We need planning for _____'s future to take into account the limited natural supports currently in place and the need to intentionally build a broader network of safe, supportive people and opportunities around him. Overall, our concern is that _____'s program focus on the functional, social, communication, self-care, safety, and transition skills he will need for adult life. We want to ensure he is being prepared not just to leave school, but to live a life that is safe, meaningful, healthy, connected, and as independent as possible.

1. Transportation skills

- ability to safely enter/exit vehicles
- waiting appropriately
- future use of supported transportation or public transit training

2. Continued Stranger safety and sexual safety

- boundaries with strangers
- body safety
- privacy rules
- consent
- safe versus unsafe touch
- recognizing grooming or manipulation
- appropriate interactions with children and vulnerable people

3. Executive functioning

- task initiation
- sequencing
- completing routines
- transitioning between activities
- flexibility
- problem-solving when things go wrong

4. Emotional regulation

- recognizing feelings in himself
- identifying triggers
- using calming strategies
- asking for help before escalation
- tolerating frustration, disappointment, and waiting

5. Functional communication

- reporting pain, illness, injury, or mistreatment
- communicating who, what, where, and when about his day
- expressing preferences appropriately
- answering safety questions reliably

- telling a trusted adult when something is wrong

6. Household living skills

- cleaning up after himself
- laundry participation
- bed-making
- putting away belongings
- simple chores
- understanding personal responsibility in shared living spaces
- he will inappropriately start washers and dishwashers to hear them running

7. Decision-making and choice-making

- making appropriate choices
- understanding consequences
- choosing between activities
- increasing ownership over simple routines

8. Generalization of learned skills

9. Recreation and meaningful use of free time

- learning how to choose activities
 - structured leisure
 - participation in hobbies safely and appropriately
 - reducing isolation and passive downtime
 - has become singular in wanting to be home, on the TV with YouTube
-

STUDENT AND TEAM VISION

Grade: Enrolled, completed course requirements but has not passed graduation test and is attending school.

Student's Vision/Postsecondary Goals (required for ages 14–22, may be completed earlier if appropriate)	
While I am in high school, I want to:	Not Applicable
After I finish high school, my education or training plans are:	In preparation for this IEP period, met with staff to discuss his likes and dislikes at school, as well as his vision for the future. shared no dislikes about his school day. He indicated that he enjoys Central Supply, Greenhouse, gym, speech, recess, and leisure activities, among others.
After I finish high school, my employment plans are:	Using a worksheet containing visually supported sentences, expressed that when he graduates, he would like to make beds, walking dogs, stock shelves, and recycling. also expressed that he would like to help out at home after graduation. When asked how hard do you think you will work at his place of employment he indicated that he will demonstrate great effort.
After I finish high school, my independent living plans are:	Using a worksheet containing visually supported sentences, expressed that when he graduates, he would like to live in a house with his mom, dad, and brother. When asked what skills do you need to live on your own after he graduates,he indicated that he needs to have skills relating to; cooking, hygiene, safety, telephone, and money. stated that his current daily living strengths are; reading recipes, grooming, washing dishes, vacuuming, wiping/dusting, laundry, making phone calls, and safety.
Additional Team Vision Ideas	
In response to the student's vision, this year:	The team recognizes that needs to develop additional skills to support him to be as independent as possible after he turns 22. Those skills will be developed across settings (vocational, classroom, and community). The team wants to continue to support growth in multiple areas.
In response to the student's vision, in 5 years:	Given the expected discharge date, the hope of his team is that he will continue to progress along his current path outlined above.

STUDENT PROFILE

The student is identified as having the following disability or disabilities.

- Autism
- Intellectual Impairment

Has the student been identified as an English Learner?

- ☐ Yes
- ☒ No

Does the student require assistive technology (AT) devices or services?

- ☒ Yes
- ☐ No

If yes, this need will be addressed in the following section(s) of the IEP:

- ☒ Accommodations/Modifications
- ☐ Goals/Objectives
- ☐ Services Delivery Grid
- ☐ Additional Information

PRESENT LEVELS OF ACADEMIC ACHIEVEMENT AND FUNCTIONAL PERFORMANCE: ACADEMICS

Describe the student’s present levels of academic achievement and functional performance in the relevant areas listed below.

Consider the areas of learning listed below and complete only the sections that apply to the student. Include relevant information and data from sources such as initial or most recent evaluations; documentation from classroom performance; parent(s), student, and teacher observations; and curriculum-based and standardized assessments, including MCAS.

Academics Subject(s) Check all that apply:		
☒ English Language Arts ☒ History and Social Sciences ☒ Math ☒ Science, Technology, and Engineering		
Briefly describe current performance	Strengths, interest areas, and preferences	Impact of student’s disability on involvement and progress in the general education curriculum or appropriate preschool activities
is a hardworking and kind young man who has strong memory skills. He has many interests including; preferred books, Chromebook/iPad, Arts and Craft, listening to music, swimming, singing, puzzles, watching TV/movies, bowling and going to the playground. He also enjoys interacting with staff/peers. the weather, scavenger hunts, Legos, construction sites, and dining out at restaurants. is currently part of the Post High School program that gives students the opportunity to learn a variety of skills which enable them to live and work as independently as possible after completion of the program. Areas of focus include functional academics, pre-employment skills, as well as social, safety, and leisure skills. While reading, does well following along with the class read-aloud and does well answering comprehension questions. In addition to lessons and tabletop vocational tasks within the classroom, receives daily pre-employment training at various work sites on campus including; laundry room, deliveries, shredding, Central Supply, Media Arts, Recycling Center, Culinary, and the Greenhouse. has also had the opportunity to visit local shops in the community where he uses different strategies he has learned in the classroom such as safety knowledge and functional academics. When in the community, he shows that he is able to find items in the store with a visual shopping list and utilizing his safety skills. Overall, has made great progress at Cardinal Cushing Centers in the educational setting. Based upon evaluation data, classroom performance, teacher and parent input, the Team determined that is eligible for Special Education due to a primary disability under the Neurological category, a secondary disability of Intellectual and tertiary disability of Autism.	During his free time, enjoys having access to; preferred books, Chromebook/iPad, Arts and Craft, listening to music, swimming, singing, puzzles, watching TV/movies, bowling and going to the playground. is able utilize his reading skills to read the daily lunch menu and read the events calendar to identify the after school activities he will be engaging in.	's disabilities fall into the categories of Neurological, Autism, and Intellectual; they impact his ability to access the general education curriculum at grade-level standards. 's diagnosis of cataplexy interferes with his ability to learn at various times. 's cataplexy is variable. It can occur when there is a noticeable antecedent such as laughing or when there is no warning sign. A loss of voluntary muscle control causes to fall to the ground if standing or walking, or to fall forward or to the side when seated in a chair. He will frequently engage in laughing, especially when presented with materials of high interest, technology, or when the instructor presentation is animated, which can escalate him to lose control of his muscles causing him to drop to the ground. At times, this can be redirected. struggles to sustain attention for longer periods of time, especially in a large group setting. He benefits from teacher prompts and visuals in front of him to complete routines and maintain expected social pragmatic skills, including maintaining personal space, and appropriate greetings. accesses the curriculum through entry points of the Massachusetts Curriculum Frameworks. At times, when does not want to engage in an academic activity he might demonstrate unexpected behaviors such as saying "no" repeatedly; swiping materials on the floor, ignoring the directions, and/or leaving the instructional area. 's attention and /or arousal level is variable and impacts his engagement in learning and task completion. He is slow to process information and requires a wait time for an appropriate response.
Academics Subject(s) Check all that apply:		
☒ English Language Arts ☒ History and Social Sciences ☒ Math ☒ Science, Technology, and Engineering		
Briefly describe current performance	Strengths, interest areas, and preferences	Impact of student’s disability on involvement and progress in the general education curriculum or appropriate preschool activities

is a 19 year-old young man who matriculated to Cardinal Cushing Centers as a day student in July 2022 and transitioned to a residential student in July of 2023. He is a hardworking and kind young man who has strong memory skills. He has many interests, including geography, singing, music, and swimming. He also enjoys the weather, scavenger hunts, bowling, soccer, Legos, construction sites, and dining out at restaurants. He has participated in Cardinal Cushing's basketball teams and practices on Fridays. Residentially, he enjoys reading books and playing games with peers and staff. is currently part of the Post High School program that affords students the opportunity to learn a variety of skills which enable them to live and work as independently as possible after completion of the program. Areas of focus include functional academics, pre-employment skills, as well as social, safety, and leisure skills. In addition to lessons and tabletop vocational tasks within the classroom, receives daily pre-employment training at various work sites on campus throughout the week including a supply/stock room, laundry room, greenhouse, thrift store, and craft boutique. He also has the opportunity to collect recycling, clean the school vans, and shred. Based upon evaluation data, classroom performance, teacher and parent input, the Team determined that is eligible for Special Education due to a primary disability under the Neurological category, a secondary disability of Intellectual and tertiary disability of Autism.	During his free time, enjoys having access to his preferred books, flash card and either a chromebook or an Ipad. is able utilize his reading skills to read the daily lunch menu and read the events calendar to identify after school activities.	's disabilities fall into the categories of Neurological, Autism, and Intellectual; they impact his ability to access the general education curriculum at grade-level standards. 's diagnosis of cataplexy interferes with his ability to learn at various times. 's cataplexy is variable. It can occur when there is a noticeable antecedent such as laughing or when there is no warning sign. A loss of voluntary muscle control causes to fall to the ground if standing or walking, or to fall forward or to the side when seated in a chair. He will frequently engage in laughing, especially when presented with materials of high interest, technology, or when the instructor presentation is animated, which can escalate him to lose control of his muscles causing him to drop to the ground. Autism-Specific Question: Does the student have needs resulting from the disability that impact progress in the general curriculum, including social and emotional development (e.g., organizational support, generalizing skills, practicing skills in multiple environments)?

- ☒ Yes
☐ No

If yes, this need will be addressed in the following section(s) of the IEP:

- ☒ Accommodations/Modifications
☒ Goals/Objectives
☒ Services Delivery Grid
☐ Additional Information

PRESENT LEVELS OF ACADEMIC ACHIEVEMENT AND FUNCTIONAL PERFORMANCE: BEHAVIORAL/SOCIAL/EMOTIONAL

Behavioral/Social/Emotional. Briefly describe current performance. Consider the use of positive behavioral interventions and supports, and other strategies, to address behavior that impedes learning.	Strengths, interest areas, and preferences	Impact of student's disability on involvement and progress in the general education curriculum or appropriate preschool activities
_____ is a social and engaging young man. He enjoys being around others, but also enjoys time in his bedroom. When around others he does require close supervision as he has a history of asking other for touches such as a high 5, which appear innocent in nature, but can quickly become more sexualized in nature for _____. He has also been known to wander from the group and inadvertently join another group/family when in the community. These wanderings are not bolting or elopement, but rather he sees something of interest and wanders to look at it. He currently has behavior guidelines which indicate contact with _____ is in the form of a fist bump only and uses the language of "One and done". _____ also has access to a variety of social stories which prepare him for unfamiliar situations or for familiar situations in which he might have had difficulties with in the past. _____ has a low tolerance for noise and often wears noise dampening headphones to block the noises of others. He wears these in both the classroom and residence. His staff are currently working with him to wear them less often as he wears them as soon as he sees anyone or anything in which he perceives might make louder noises. When _____ is in the community, he will often run to the bathroom when overexcited. During these times, he does not pay attention to which bathroom he is entering and may inadvertently enter the ladies bathroom. For this reason staff remains within arms reach of him when in the community and guides him to the correct bathroom as needed.	_____ is a social young man who greatly enjoys listening to music and singing, looking at pictures of family and friends, swimming, running with the Special Olympics track and field, biking during bike club, participating in class and after in after-school recreational activities. He talks with most everyone and is quick to ask who someone is if there is an unfamiliar person around. Overall, he does well following directions, but might need some prompts to remain with the group during transitions. _____ is an excellent reader and enjoys reading books on his own as well as with his staff. He will often enjoy reading a page then asking his staff to read the next page and so on.	Overall, _____ has made great progress in all areas since joining Cardinal Cushing Centers. His community involvement is his biggest obstacle given his wandering and inadvertent joining of other groups as well as some of his sexualized actions. His low tolerance for noise can sometimes make it hard for him to concentrate and participate effectively in class as well. While _____ is a social young man, his lack of boundaries and appropriate social skills can make it hard for him to keep and maintain solid/long term friendships.
Describe any disability-related skills and proficiencies the student needs in order to avoid and respond to bullying, harassment, or teasing. This section must be completed for students who have a disability that affects social skills development; students vulnerable to bullying, harassment, or teasing; and students with autism.	Specify how these needs, if any, will be addressed in the IEP.	
Due to _____'s diagnosis of Autism Spectrum Disorder, he is very vulnerable to bullying, harassment and teasing. _____'s social skills are delayed and limit his ability to realize if he is being bullied or harassed. _____ struggles with self-advocating and requires supervision to identify, avoid and respond to bullying, harassment, and teasing appropriately. Additionally, due to his lack of social skills he might be unaware if his attempted social interactions are bullying to others.	Cardinal Cushing observes a zero-tolerance policy for bullying and has formulated a comprehensive approach for addressing and preventing bullying, cyber-bullying, harassment, and retaliation. Students identified as having a disability may participate in or be vulnerable to bullying, harassment, or teasing based upon that disability. These concerns are addressed both programmatically and within the goals of this IEP.	

Autism-Specific Question: Does the student require any positive behavioral interventions, strategies, and supports to address their behavioral difficulties resulting from autism spectrum disorder?

- ☒ Yes
- ☐ No

Autism-Specific Question: Does the student need to develop social interaction skills and proficiencies?

- ☒ Yes
- ☐ No

Autism-Specific Question: Does the student have needs related to changes in environment or to daily routines?

- ☒ Yes
- ☐ No

Autism-Specific Question: Does the student engage in repetitive activities and stereotyped movements?

- ☒ Yes
- ☐ No

Autism-Specific Question: Does the student have needs resulting from their unusual responses to sensory experiences?

- ☒ Yes
- ☐ No

If yes to any of the above, these needs will be addressed in the following section(s) of the IEP:

- ☒ Accommodations/Modifications
- ☒ Goals/Objectives
- ☒ Services Delivery Grid
- ☐ Additional Information

PRESENT LEVELS OF ACADEMIC ACHIEVEMENT AND FUNCTIONAL PERFORMANCE: COMMUNICATION

Communication Briefly describe current performance.	Strengths, interest areas, and preferences	Impact of student's disability on involvement and progress in the general education curriculum or appropriate preschool activities
is a friendly verbal communicator who is able to make his wants and needs known throughout his day given the structure, predictability and routine of his academic and vocational environments. Overall, continues to demonstrate increased success in targeting his speech and language goal and subsequent objectives within structured environments compared to unstructured. To aid in his communication, benefits from extra processing time, gaining his attention prior to engaging with him, breakdown of complex/novel directions, and modeling use of appropriate social language.	is a very social, determined, and hardworking verbal communicator who is an active participant in both his small group and large group speech sessions. demonstrates relative strengths in his social pragmatic language in the areas of greeting his communication partner, terminating conversations, advocating for his wants/needs, identifying feelings in himself and others, and providing on-topic comments with a prompt. On his recent IEP, has increased his skills within structured settings in directing others, categorizing relationships, identifying expected and unexpected behaviors, identifying an appropriate communication partner to express his wants and needs to, and sharing details about his day.	Areas of need that impact 's communication are his expressive and pragmatic language skills. 's reduced communication skills impact his ability to generalize his skills across various communication partners and settings including identifying busy/available in real-time, engaging with others, and avoiding repetitive information. Additionally, 's diagnosis impacts his impulsivity with his communication in real-time scenarios and with recalling information. demonstrates splintered skills with his communication, specifically with identifying social expectations and answering why questions. When asking why questions in more structured environments, he successfully answers why questions, such as "why do we stay with the group in the community?" and "who do we stay with?", however, when asking these questions in more unstructured environments and in real-time scenarios, he demonstrates increased difficulty due to his recall skills. When recalling a specific situation with , his disability impacts his ability to successfully recall these moments and to identify the accurate social expectation. Due to 's splintered skills in mock scenarios versus real-time scenarios, it impacts his ability to generalize his communication skills across various settings. will continue to work on these skills in real-time scenarios and with various communication partners to begin to work towards generalization of his communication abilities.

Does the student require the use of augmentative and alternative communication (AAC)? Consider any AAC needs for non-speaking students or those with limited speech.*

- ☐ Yes
- ☒ No

Autism-Specific Question: Does the student have needs in the areas of verbal and nonverbal communication, including but not limited to those identified in assistive technology/AAC evaluation(s)?

- ☒ Yes
- ☐ No

If yes, these needs will be addressed in the following section(s) of the IEP:

- ☒ Accommodations/Modifications
- ☒ Goals/Objectives
- ☒ Services Delivery Grid
- ☐ Additional Information

*This component is recommended to be included in the IEP but is not required by state or federal laws or regulations.

PRESENT LEVELS OF ACADEMIC ACHIEVEMENT AND FUNCTIONAL PERFORMANCE: ADDITIONAL AREAS

Additional Areas, as Applicable (such as activities of daily living, health, hearing, motor, sensory, and vision) Briefly describe current performance and any applicable documentation. Please note that parent(s) are only asked to share health information voluntarily.	Strengths, interest areas, and preferences	Impact of student's disability on involvement and progress in the general education curriculum or appropriate preschool activities
OT: AK demonstrates functional writing and typing skills and is able to independently manage his school-based ADL's. He is capable of managing his residential-specific self care with the use of reminders, visuals, mnemonics, and verbal prompts as needed. AK's sensory needs are managed through access to noise-dampening headphones and strategies such as taking deep breaths when overstimulated often by excess excitement. He benefits from naturally occurring movement breaks throughout his day to promote attention and regulation. AK benefits from breakdown of novel and familiar multi-step tasks, paired with visuals across settings. AK often requires several verbal prompts to gain and maintain his attention to a directed task due to internal and external distractions as well as his desire to socialize with staff and peers. AK presents with the foundational skills to complete most daily living tasks, but factors including attention level, motivation, preferred versus non-preferred staff and consistency with expectations, result in varying levels of independence displayed.	OT: AK is always agreeable and participates in OT activities without hesitation. AK's memory is one of his many strengths, which he often applies strategically to utilize mnemonic devices through song, using repetition and rhythm to recall information or to interpret the passing of time. For example, when learning phone numbers for potential safety situations, AK will recall them in a "sing-songy" voice. AK benefits from these mnemonic methods to complete ADL routines with effective thoroughness, for example saying "1 fish, 2 fish, red fish, blue fish" while applying his deodorant or washing his hands while rhythmically counting to 10. AK also has strengths in his sense of humor, social nature, and his expansive interests and curiosity. Although he requires support secondary to distractibility, AK's ability to follow through a checklist is a skill that will help him complete multi-step tasks in the future. Per residential staff, AK is a good advocate for his own needs and is very independent with leisure time. He gets along well with peers and participates willingly in all activities.	OT: AK's diagnoses impact his ability to access the general education curriculum. AK benefits from supports in the areas of executive functioning, auditory processing, sensory integration, attention, impulsivity, and praxis across settings. AK requires individualized support and a modified, structured curriculum and environment to set him for growth and success in his vocational, academic, and residential programs. AK's areas of need in occupational therapy are supported through his programming, accommodations, and modifications.

* This component is recommended to be included in the IEP but is not required by state or federal laws or regulations.

POST-SECONDARY TRANSITION PLANNING

Complete for eligible students aged 14–22 and update annually. Complete also for students who are 13 and will turn 14 during this IEP period.

Postsecondary Transition Briefly describe current performance.	Strengths, interest areas, and preferences	Impact of student's disability on involvement in the general education curriculum and/or specific area of postsecondary transition
Education/training is currently part of the Post High School program that gives students the opportunity to learn a variety of skills which enable them to live and work as independently as possible after completion of the program. Areas of focus include functional academics, pre-employment skills, as well as social, safety, and leisure skills. While reading, does well following along with the class read-aloud and does well answering comprehension questions. As a member of Cardinal Cushing, practices and refines skills, related to all academic areas, functional math, functional reading, functional writing, task completion, safety and social skills, and communication. He has opportunities within the classroom to engage in activities at his ability level. will continue to practice and build his social/emotional and relationship skills while placed at Cardinal Cushing Centers.	is a social young man who greatly enjoys listening to music and singing, looking at pictures of family and friends, swimming, running with the Special Olympics track and field, biking during bike club, participating in class and after in after-school recreational activities. He talks with most everyone and is quick to ask who someone is if there is an unfamiliar person around. Overall, he does well following directions, but might need some prompts to remain with the group during transitions. While he appears to get along well with most of his peers in the classroom. is an excellent reader and enjoys reading books on his own as well as with his staff. He will often enjoy reading a page then asking his staff to read the next page and so on.	's disabilities fall into the categories of Neurological, Autism, and Intellectual; they impact his ability to access the general education curriculum at grade-level standards. 's diagnosis of cataplexy interferes with his ability to learn at various times. 's cataplexy is variable. It can occur when there is a noticeable antecedent such as laughing or when there is no warning sign. A loss of voluntary muscle control causes to fall to the ground if standing or walking, or to fall forward or to the side when seated in a chair. He will frequently engage in laughing, especially when presented with materials of high interest, technology, or when the instructor presentation is animated, which can escalate him to lose control of his muscles causing him to drop to the ground. At times, this can be redirected. struggles to sustain attention for longer periods of time, especially in a large group setting. He benefits from teacher prompts and visuals in front of him to complete routines and maintain expected social pragmatic skills, including maintaining personal space, and appropriate greetings. accesses the curriculum through entry points of the Massachusetts Curriculum Frameworks. At times, when does not want to engage in an academic activity he might demonstrate unexpected behaviors such as saying "no" repeatedly; swiping materials on the floor, ignoring the directions, and/or leaving the instructional area. 's attention and /or arousal level is variable and impacts his engagement in learning and task completion. He is slow to process information and requires a wait time for an appropriate response.
Employment Given visual and staff support, has expressed that he may be interested in working in the areas of; stocking shelves, walking dogs, making beds, and recycling,. In addition to lessons and tabletop vocational tasks within the classroom, receives daily pre-employment training at various work sites on campus including; laundry room, deliveries, shredding, Central Supply, Media Arts, Recycling Center, Culinary, and the Greenhouse. participates in laundry duties, such as loading & unloading, starting the machine, and folding. At Greenhouse, the students typically work on lawn care and horticultural tasks. At bottles redemption, students typically sort and count cans and bottles to be recycled. also practices vocational skills in craft making, and at the clothing stockroom on campus, as well as a cleaning job around campus. As he progresses through the program, 's vision and interests will continue to be incorporated into his employment plans. When completing tasks, will be reminded to use both hands.	has been working in several different on campus worksites. He has shown strengths in our laundry room, shredding room, Central Supply, Culinary and Take 2. In laundry he is able to follow a check list and complete a routine with minimal staff support. While is engaging in shredding, he is able to identify is staples need to be removes as well as following the guidelines of only a few papers at a time. In Central Supply he is able to follow a color coded list to find items and complete a order from an order form. He is also able to complete a delivery with staff support. In Culinary, is able to fill snack orders for different classrooms around campus. He assists in cafeteria clean up (e.g. stacking chairs, cleaning the tables, sweeping the floor, disposing of trash, etc.)	's disabilities fall into the categories of Neurological, Autism, and Intellectual; they impact his ability to access the general education curriculum at grade-level standards. 's diagnosis of cataplexy interferes with his ability to learn at various times. 's cataplexy is variable. It can occur when there is a noticeable antecedent such as laughing or when there is no warning sign. A loss of voluntary muscle control causes to fall to the ground if standing or walking, or to fall forward or to the side when seated in a chair. He will frequently engage in laughing, especially when presented with materials of high interest, technology, or when the instructor presentation is animated, which can escalate him to lose control of his muscles causing him to drop to the ground. At times, this can be redirected. struggles to sustain attention for longer periods of time, especially in a large group setting. He benefits from teacher prompts and visuals in front of him to complete routines and maintain

Complete for eligible students aged 14–22 and update annually. Complete also for students who are 13 and will turn 14 during this IEP period.		
Postsecondary Transition Briefly describe current performance.	Strengths, interest areas, and preferences	Impact of student's disability on involvement in the general education curriculum and/or specific area of postsecondary transition
		expected social pragmatic skills, including maintaining personal space, and appropriate greetings.
Community experiences/postschool adult living, if applicable goes out into the community with his class on structured activities. He is provided with close adult supervision at all times. While on these outings, has the opportunity to interact with the community. will address safe boundaries and safety awareness when interacting with people out in the community and within the campus environment. During these outings he also practices his communication skills and his safety skills. Additionally, will continue to develop his independent self-help skills as part of his program at Cardinal Cushing. He will participate in lessons and activities focused on healthy living, safety, leisure skills, and more to help him live as independently as possible as an adult.	In the community has been working on staying with the group and listening to staff instructions. He shows great enthusiasm to be in the community and a curiosity for his environment while there.	's disabilities fall into the categories of Neurological, Autism, and Intellectual; they impact his ability to access the general education curriculum at grade-level standards. 's diagnosis of cataplexy interferes with his ability to learn at various times. 's cataplexy is variable. It can occur when there is a noticeable antecedent such as laughing or when there is no warning sign. A loss of voluntary muscle control causes to fall to the ground if standing or walking, or to fall forward or to the side when seated in a chair. He will frequently engage in laughing, especially when presented with materials of high interest, technology, or when the instructor presentation is animated, which can escalate him to lose control of his muscles causing him to drop to the ground. At times, this can be redirected. struggles to sustain attention for longer periods of time, especially in a large group setting. He benefits from teacher prompts and visuals in front of him to complete routines and maintain expected social pragmatic skills, including maintaining personal space, and appropriate greetings.

The identified areas of postsecondary transition will be addressed in the following section(s) of the IEP:

- ☒ Accommodations/Modifications
- ☒ Services Delivery Grid
- ☒ Goals/Objectives
- ☐ Additional Information

Projected date of graduation/program completion:	01/25/2027
Projected type of completion document (diploma, certificate of attainment, or other locally defined completion document):	Certificate of Attainment

Planned Course of Study

What requirements does the student need to meet to receive that type of completion document? What is the student's planned course of study?

School Year 2024-25 Grade 99 (Actual Courses)	School Year 2025-26 Grade 99 (Potential Courses)	School Year 2026-27 Grade 99 (Potential Courses)	School Year 2027-28 and beyond
Provided remains eligible for special education services and attends programming, he will receive a Certificate of Attainment upon age 22.	n/a	n/a	n/a

What is the student's current status regarding meeting those requirements?

is currently meeting all requirements.

COMMUNITY AND INTERAGENCY CONNECTIONS

Agency	Description of Support Provided	Role of school staff who will be the liaison to the agency, as needed (please include contact information)

TRANSITION TO ADULT SERVICE AGENCY OR AGENCIES - 688 REFERRAL

Is the student within two years of exiting special education services?	☐ Yes ☒ No
If yes, has the Team has discussed whether the student meets the criteria for a 688 referral?	☐ Yes ☐ No
Has a 688 referral been submitted for this student?	☒ Yes ☐ No ☐ Not Applicable (If yes, indicate the date the referral was submitted: 04/30/2021.)*
If yes, please identify the agency to which referral was made:	DDS

ACCOMMODATIONS AND MODIFICATIONS

Accommodations List the accommodations the student needs to make progress in the areas of academic achievement and functional performance. Leave blank any boxes that are not appropriate for the student.

	Presentation of Instruction The way information is presented.	Response The way the student responds.	Timing and/or Scheduling The timing and scheduling of the instruction.	Setting and/or Environment The characteristics of the setting.
Classroom Accommodations	Gain _____'s attention prior to engaging with him Limit visual clutter Sing-song/Mnemonic devices when teaching pacing and recall of multi-step tasks (e.g. recalling a phone number, applying deodorant, etc) Break down 2+ step directions and provide modeling/repetition as needed, in addition to visual checklists Modeling use of appropriate social language (e.g., "How do you feel _____?", "I like to watch _____, what do you like to watch?" etc.) Use of first/then language Check back for comprehension Additional time to process and respond to verbal information Repeat prompts as needed after wait time Access to visual supports as needed Daily visual schedule Visual timer Bold lines for cutting with scissors Items presented at eye-level/use of desk stand as appropriate Prompts to maintain appropriate distance from others Prompts to use "fist bumps" only When _____ requests the bathroom, especially during highly preferred or motivating activities, provide him with choices such as a walk, break, or space, to ensure the validity of his response of requesting the bathroom and then model the appropriate social language such as, "You can always ask for a break by saying I need a break". Provide assistance navigating novel/less familiar problems and social situations, as needed Highly structured routine/expectations across settings Access to checklists to increase independence and staying on track Use of the word "pause" as opposed to "stop" for successful stopping when in motion Gain _____'s attention prior to engaging with him - check in with understanding through recall Access to social stories for expected and appropriate community behavior	Additional time to process and respond to verbal information Access to fidgets/sensory strategies as needed Access slant board and weighted pencil when writing Left handed scissors Scribe for longer written output/option to type Use of calculator for mathematical computations as needed	Access to breaks/movement breaks between tasks as needed Visual timer for transitions and task completion Highly structured routines across settings	Access to chair with arms Use of elevator when available When using stairs, staff will follow health center protocol for cataplexy Access to noise-dampening headphones Decrease visual clutter within environment when possible Preferential seating away from doors or windows when possible to decrease distractions during academics/activities

	Presentation of Instruction The way information is presented.	Response The way the student responds.	Timing and/or Scheduling The timing and scheduling of the instruction.	Setting and/or Environment The characteristics of the setting.
	Access to noise dampening headphones Verbal cue "long legs" to correct positioning in his chair

Modifications List the modifications, if any, that are needed to the student's program so they can meet their goals, make progress, and participate in activities alongside students with and without disabilities. Leave blank any boxes that are not appropriate for the student.

	Content	Instruction	Student Output
Classroom Modifications	Curriculum content accessed at entry points from the Massachusetts Curriculum Frameworks and learning standards will be modified by providing key concepts and eliminating extraneous detail through the use of developmentally and chronologically appropriate concepts. The primary focus will be on functional academics and life skills to enable to live as independently as possible following the completion of the program.	Using an integrated therapy model and a total communication approach, will receive explicit instruction in the areas of functional academics, pre-employment skills, as well as daily living, social, safety, and leisure skills. Evidenced-based teaching strategies used will include direct instruction, task analysis, teacher and/or video modeling, multisensory presentation, prompt fading techniques, frequent repetition and review, natural environmental teaching, opportunities for generalization, and 1:1 or small group instruction. Frequent positive praise and reinforcement will be utilized, including the school-wide use of Positive Behavioral Intervention and Support (PBIS). Behavior interventions will utilize the principles of Applied Behavior Analysis and explicit small-group instruction in social pragmatics will be provided in order to assist him in initiating and maintaining appropriate social interactions with peers and adults.	Cardinal Cushing Centers at Hanover is an ungraded Chapter 766-approved educational program. 's progress in all curriculum areas will be assessed via frequent communication between program personnel and his family, alternative assessment tools, quarterly progress reports, scheduled data collection, and staff member observations.

MEASURABLE ANNUAL GOALS

Please identify the academic and functional goals for this student this year. The goals must be measurable and meet the student’s needs that result from their disability to enable them to be involved in and make progress in Early Childhood Outcomes (ages 3–5) or the Massachusetts Curriculum Frameworks (older students). The goals must meet each of the student’s other educational needs that result from their disability

Goal Area:				
1 - Functional Life skills				
Baseline (What can the student currently do?):				
has been making progress in the area of functional life skills. Throughout his school day, he is given opportunities to practice functional life skills that he has learned in the classroom as well as demonstrating skills in the community. When using a visual and/or written schedule to plan out his daily activities, he is able to identify the start and end times of certain activities. requires assistance when calculating future times, for example; determining when it is appropriate to leave to ensure he arrives on time. is able to read functional literacy items that are familiar to him (menus, store flyer, product description, instructions, schedules, etc.). However, demonstrates difficulty when answering comprehension questions regarding the literacy items and identifying key details. He does well when he is given staff support throughout the beginning of the task and will ask for help independently. While is differentiating wants and needs, he shows strengths in identifying the item he needs to sort but will often put it in the wrong category. has demonstrated inconsistent understanding when presented less familiar or real-life scenarios. has shown strength in his understanding of budgeting and how to ensure that he has enough money to buy certain items. He is working on expanding his budgeting skills to apply to his functional life skills. The following goal will support in making growth with regards to his functional life skills which will allow him to live more independently as an adult.				
Annual Goal/Target What skill(s) will the student be expected to attain by the end of this IEP's timeframe?	Criteria What measurement will be used to determine whether the goal has been achieved?	Method How will progress be measured?	Schedule How frequently will progress be measured?	Person(s) Responsible Who will monitor progress?
will demonstrate improvement in his functional life skills as measured by the following objectives.	will meet the following objectives with 80% accuracy in 4 out of 5 opportunities observed.	Observation Work Samples Data Collection	End of the Quarter	Special Education Teacher
Short-term objectives and/or benchmarks (intermediate steps between the baseline and the measurable annual goal)				
1.) When using his schedule to plan out his day or activities, will be able to calculate future time (if your event starts at 10:00 and it takes 20 minutes to get there, what time should you leave?) with 80% accuracy in 4 out of 5 opportunities observed.				
2.) will read a variety of functional literacy items (menus, store flyer, product description, instructions, schedules, etc.) at his level and answer comprehension questions (e.g., identifying key details, making simple inferences) with 80% accuracy in 4 out of 5 opportunities observed.				
3.) Given visual supports and real-life or simulated scenarios, will accurately differentiate wants and needs with 80% accuracy in 4 out of 5 opportunities observed.				
4.) Given a set amount of money and a graphic organizer, will create a monthly budget by sorting expenses into wants and needs with 80% accuracy in 4 out of 5 opportunities observed.				

Schedule of Progress Reporting

Explain how and when parent(s) will be periodically informed of the student’s progress toward meeting the annual goal(s):

?

MEASURABLE ANNUAL GOALS

Please identify the academic and functional goals for this student this year. The goals must be measurable and meet the student’s needs that result from their disability to enable them to be involved in and make progress in Early Childhood Outcomes (ages 3–5) or the Massachusetts Curriculum Frameworks (older students). The goals must meet each of the student’s other educational needs that result from their disability

Goal Area:				
2 - Vocational Independence				
Baseline (What can the student currently do?):				
has been working hard on his vocational skills throughout his school day. When arrives at a job site or the beginning of a vocational task, he will often wait for staff to instruct him what to do and needs prompting to attend the the vocational task. will also often becoming distracted by external stimuli around him and requires supervision to ensure he does not walk away from the task or group. When given tasks, works hard and is able to complete tasks given to him in a timely manner as long as there is a staff nearby. While utilizing checklists, will often walk to staff and repeat what the checklist states before he starts a task. During the transition from one task to another, is able to check off the completed task but requires prompting to continue. He does well with completing vocational tasks such as making deliveries in Central Supply, Culinary, shredding room, attending the laundry room, as well as participating in the greenhouse. After completing various tasks, will ask for a break although he is not finished with the work at the vocational site. He does require prompting to keep working to the best of his ability although he wants a break. When finishing the task or making corrections, he will often attempt to rush through the task to access the break but with positive reinforcement and the reminder of coping skills, he is able to slow down and complete the task accurately. The following goal will target the improvement of 's vocational independence which will allow him to live more independently as an adult.				
Annual Goal/Target What skill(s) will the student be expected to attain by the end of this IEP's timeframe?	Criteria What measurement will be used to determine whether the goal has been achieved?	Method How will progress be measured?	Schedule How frequently will progress be measured?	Person(s) Responsible Who will monitor progress?
Given faded prompts, will demonstrate improvement in his vocational independence skills and self-advocacy as measured by the following objectives.	will meet the following objectives in 4 out of 5 vocational opportunities.	Observation Work Samples Data Collection	End of the Quarter	Special Education Teacher
Short-term objectives and/or benchmarks (intermediate steps between the baseline and the measurable annual goal)				
1.) Upon arrival at the job site, will independently greet his supervisor and ask for his task checklist in 4 out of 5 vocational opportunities observed.				
2.) Before starting the tasks, will look at the checklist to make sure that he understands and ask for help if needed in 4 out of 5 vocational opportunities observed.				
3.) Using his checklist and marking each task when done, will initiate and complete at least three tasks with fading staff support in 4 out of 5 vocational opportunities observed.				
4.) After completing three tasks and referring to the checklist, will check in with the supervisor for accuracy and thoroughness and make corrections if necessary before asking for a break in 4 out of 5 vocational opportunities observed.				

Schedule of Progress Reporting

Explain how and when parent(s) will be periodically informed of the student’s progress toward meeting the annual goal(s):

?

MEASURABLE ANNUAL GOALS

Please identify the academic and functional goals for this student this year. The goals must be measurable and meet the student’s needs that result from their disability to enable them to be involved in and make progress in Early Childhood Outcomes (ages 3–5) or the Massachusetts Curriculum Frameworks (older students). The goals must meet each of the student’s other educational needs that result from their disability

Goal Area:				
3 - Receptive and Pragmatic Language				
Baseline (What can the student currently do?):				
Data for this baseline is based on observations and data collected in speech and language sessions and within the classroom context. is a social and active participant in speech and language sessions in large groups in the classroom or speech groups in a therapy room. He continues to be more successful in targeting these objectives in structured environments compared to unstructured. is a friendly verbal communicator who is able to make his wants and needs known throughout his day given the structure, predictability and routine of his academic and vocational environments. has benefitted from learning his speech and language skills within highly structured environments with familiar communication partners and requires more support to generalize these skills with novel communication partners and in other settings. has strong speech and language skills and is beginning to target generalization of them across settings and communication partners, especially in more unstructured settings such as vocational sites, community outings, and his classroom speech group. appropriately directs others in 80% of opportunities in structured settings in mock or real-time scenarios, such as asking others to move from his space. He benefits from a verbal reminder to only provide the directive one time. He categorizes relationships in 77% of opportunities given a visual support or one verbal prompt. In one data point, successfully identified that he can ask a community helper for help in a grocery store. He identifies expected and unexpected verbal and non-verbal communication skills in 84% of structured opportunities. He successfully identified that pushing someone is an unexpected behavior and that he should ask the person for space as the expected behavior or tell a teacher. identifies an appropriate communication partner in 90% of opportunities in mock scenarios, such as which teacher/staff to ask for help. successfully recalls at least 2 details about his day in 85% of opportunities. At the beginning of his speech sessions, likes to share about what he did the night before, such as what he had for dinner, who he saw, or the activities he participated in with his house. Currently, has made great strides with his skills in highly structured environments and in mock scenarios, but demonstrates increased difficulty in generalizing these skills to various settings and communication partners. He has demonstrated difficulty in generalizing the skills such as identifying busy/available and then selecting the appropriate strategy to demonstrate his understanding of whether they are busy/available. He also continues to demonstrate difficulty in repeating information especially in more unstructured settings. He is oftentimes very eager to share information and benefits from 3-4 prompts to make a new comment or question based on his relationship with his communication partner. will benefit from learning all of these skills and working on them in more unstructured settings and across various communication partners in order to expand his independence in his overall speech and language skills.				
Annual Goal/Target What skill(s) will the student be expected to attain by the end of this IEP's timeframe?	Criteria What measurement will be used to determine whether the goal has been achieved?	Method How will progress be measured?	Schedule How frequently will progress be measured?	Person(s) Responsible Who will monitor progress?
will increase his receptive and social pragmatic language skills across a variety of communication partners and settings, by identifying busy/available, engaging with various communication partners, and avoiding repetitive information within a conversational exchange in 80% of opportunities as measured by the following objectives	will achieve this goal in 80% of opportunities across various communication partners and settings	Work Samples Observation Data Collection	End of the Quarter	Speech Language Pathologist Speech Language Assistant
Short-term objectives and/or benchmarks (intermediate steps between the baseline and the measurable annual goal)				
1) Across various settings, will identify verbal and nonverbal communication that indicates if a person is busy or available (e.g., talking to someone else, teaching, not in the room, on the phone, etc.) in 80% of opportunities given 1 verbal/visual prompt				
2) After determining that a person is busy, will select an appropriate strategy to demonstrate his understanding (i.e., come back later, select an alternate person, wait, etc.) in 80% opportunities given visual support and up to 1 verbal/gestural prompt				
3) After determining that a person is available, will engage with the person by asking a question, requesting a want/need, or appropriately directing others in 80% of opportunities given visual support and up to 1 verbal/gestural prompt				
4) Across a variety of communication partners (e.g., staff, classmates, friends, family, community helpers, etc.) will avoid repetitive information during a conversation by initiating an appropriate topic of conversation based on his relationship with the person or making a new on-topic comment in 80% of opportunities given a visual and up to 1 verbal prompt (e.g., “did you already say that?”, “can we ask something else?”)				

Schedule of Progress Reporting

Explain how and when parent(s) will be periodically informed of the student’s progress toward meeting the annual goal(s):

Quarterly progress reports will be given to measure progress.

MEASURABLE ANNUAL GOALS

Please identify the academic and functional goals for this student this year. The goals must be measurable and meet the student’s needs that result from their disability to enable them to be involved in and make progress in Early Childhood Outcomes (ages 3–5) or the Massachusetts Curriculum Frameworks (older students). The goals must meet each of the student’s other educational needs that result from their disability

Goal Area:				
4 - ADL/IADL				
Baseline (What can the student currently do?):				
With his treating OT assistant and other trained specialists, has demonstrated the ability to complete his hygiene and home care routines with the use of individualized visual supports and gestural prompts. Throughout his day, requires frequent verbal redirection to help him remain on task when he becomes internally and externally distracted. This increase in level of support is determined based on 's ability to attend to the task at hand, not his ability to complete a task itself. Per staff report, has shown varying levels of independence across ADL/IADL routines. In addition to his ability to display variations of independence, possesses the necessary motor planning and praxis skills as demonstrated by his mastered skills over the last IEP period. He has demonstrated the ability to physically and effectively perform his activities of daily living when provided with accommodations and expectations but does not access these abilities consistently across environments and/or support staff. At times, there appears to be a disconnect between 's capabilities and his capacity to be more independent, depending on a variety of factors such as his attention level, motivation, preferred versus non-preferred staff, and consistency with expectations. will benefit from continued application and generalization of his self and home care skills across settings and staff members to promote autonomy as he gets closer to adult living.				
Annual Goal/Target What skill(s) will the student be expected to attain by the end of this IEP's timeframe?	Criteria What measurement will be used to determine whether the goal has been achieved?	Method How will progress be measured?	Schedule How frequently will progress be measured?	Person(s) Responsible Who will monitor progress?
Across 2 familiar and 1 novel staff, will demonstrate maintenance of ADL/IADL skills with the use of individualized supports with fading staff assistance as measured by the following objectives:	in 4 out of 5 opportunities across 2 familiar and 1 novel staff	Checklists Data Collection Observation	End of the Quarter	Residential Staff Monitored by OT/OTA
Short-term objectives and/or benchmarks (intermediate steps between the baseline and the measurable annual goal)				
1. Following an initial direction, will gather the necessary items (e.g. hygiene products, accommodations, visuals, etc.) needed for an ADL/IADL task, with 90% accuracy and no more than 1 verbal cue. 2. Following an initial direction, will select appropriate clothing based on the weather predicted for the day, with 90% accuracy and no more than 1 verbal cue. 3. Following an initial direction, will complete his showering routine with appropriate thoroughness, with no more than 2 additional verbal cues total. 4. Following an initial direction, will complete his toothbrushing routine with appropriate thoroughness, with no more than 1 additional verbal cue total.				

Schedule of Progress Reporting

Explain how and when parent(s) will be periodically informed of the student's progress toward meeting the annual goal(s):
Quarterly progress reporting

Participation in the General Education Setting

Can the student's educational needs be met in the general education setting, with or without the use of supplementary aids and services?

- ☐ Yes
- ☒ No

If *no*, *provide an explanation* of the extent to which the student will not participate in general education. Include a description of the specific supplementary aids and services considered before determining that the student would be removed from a general education class or activity.

requires structured, individualized instruction in a small group setting to learn and generalize new skills due to his neurological, intellectual, and Autism based disabilities. attends a year-round residential school to address these needs.

Draft

SERVICE DELIVERY

Include specially designed instruction, related services, and supports based on peer-reviewed research to the extent practicable (including, if applicable, positive behavioral supports and support/training for school personnel and/or parent(s)). Consider providing services in general education settings before considering other options.

Goal Number(s)	Type of Service(s)	Provided by List job title	Location	Frequency/Duration __ X __ minutes per 7 - day cycle		Start Date	End Date
A. Consultation (Indirect Services to School Personnel and Parents)							
1-4	Speech and Language Services	SLP/SLPA	Special Education Setting	Monthly	0 Hrs 45 Mins	04/10/2026	04/09/2027
4	Occupational Therapy Services	OTR/COTA	Special Education Setting	Weekly	0 Hrs 30 Mins	04/10/2026	04/09/2027
1-4	Behavior Consultation	BCBAorRBT	Special Education Classroom	Monthly	0 Hrs 30 Mins	04/10/2026	04/09/2027
1-4	Case Management	SPC	Special Education Classroom	Weekly	0 Hrs 30 Mins	04/10/2026	04/09/2027
B. Special Education and Related Services in General Education Classroom (Direct Service)							
C. Special Education and Related Services in Other Settings (Direct Service)							
1,2	Functional Life Skills/Vocational	Special Education Teacher	Special Education Classroom	Weekly	360 Mins	04/10/2026	04/09/2027
3	Speech and Language Services	SLP/SLPA	Special Education Classroom	Weekly	0 Hrs 30 Mins	04/10/2026	04/09/2027
1,3	Residential	RLSI	Residence	Weekly	0 Hrs 8160 Mins	04/10/2026	04/09/2027

Transportation Services

- ☒ Transportation will be provided in the same manner as it would be for students without disabilities. Please note that if the student is placed in a program located at a school **other** than the school the student would have attended if not eligible for special education, transportation will be provided.
- ☐ The student requires transportation supports and/or services as a related service.

State and District-Wide Assessments and Accommodations

Identify state or district-wide assessments planned during this IEP period:

State Assessments

Districtwide Assessments

☒ No state assessments at this grade level

Fill out the table below. Consider any state or district-wide assessment to be administered during the time span covered by this IEP. For each content area, identify the student's assessment participation status by putting a ✓ in the corresponding box for column 1,2, or 3.

CONTENT AREAS	1. Assessment participation: Student participates in on-demand testing under routine conditions in this content area.	2. Assessment participation: Student participates in on-demand testing with accommodations in this content area. (See 1 below)	3. Assessment participation: Student participates in alternate assessment in this content area. (See 2 below)
	COLUMN 1	COLUMN 2	COLUMN 3
English Language Arts	☐	☐	☐
History and Social Sciences	☐	☐	☐
Mathematics	☐	☐	☐
Science and Technology	☐	☐	☐
Reading	☐	☐	☐
Listening	☐	☐	☐
Speaking	☐	☐	☐
Writing	☐	☐	☐

- 1 For each content area identified by a ✓ in the column 2 above: note in the space below, the content area and describe the accommodations necessary for participation in the on-demand testing. Any accommodations used for assessment purposes should be closely modeled on the accommodations that are provided to the student as part of his instructional program.
- 2 For each content area identified by a ✓ in column 3 above: note in the space below, the content area, why the on-demand assessment is not appropriate and how that content area will be alternately assessed. Make sure to include the learning standards that will be addressed in each content area, the recommended assessment method(s) and the recommended evaluation and reporting method(s) for the student's performance on the alternate assessment.

SCHEDULE MODIFICATION

Does the student require a different duration to their school program including the length of their day or year so that they can receive a free appropriate public education?

- ☒ Yes
- ☐ No

If yes, what are the student's disability-related needs that require a different schedule?

Due to the nature and severity of 's multiple disabilities, he requires an extended year setting to help prevent regression of previously learned skills and lessen recoupment time.

If yes, describe the change in schedule to the student's educational program.

attends a 365-day residential educational program.

Does the student require services in the Extended School Year timeframe?

- ☒ Yes
- ☐ No

Note: If the student requires a longer year, please include the services they will receive (including, if applicable, positive behavioral supports and support/training for school personnel and/or parent(s)) in the Extended School Year section.

ADDITIONAL INFORMATION

Record other IEP Information not previously stated, e.g., information about the student that is important to know but is not addressed through IEP goals and services.

At the meeting on April 30, 2021 the topics of the Chapter 688 Referral, Age of Majority and Transfer of Rights were introduced.

's team members will help him prepare for his annual IEP meeting.

The Team met on 2/14/2025 and agreed to add a consult for 15 minutes/week for OT to work with residential staff to specifically address 's independence with functional daily living tasks. The consult is scheduled from 2/14/2025-4/18/2025.

10/9/2025 (Amendment)- is participating in an 8-10 week intervention with a school clinician regarding boundary violations. An intervention plan has been given to the parents and a meeting is set for 12/16/25 to review the data from the intervention.

RESPONSE SECTION

School Assurance: I certify that the goals in this IEP are those recommended by the Team and that the indicated special education services will be provided.

Name and role of LEA representative:	, OOD Coordinator, Franklin Public Schools	Signature:		Date:

Student Name:

ID:

Grade: Enrolled, completed course requirements but has not passed graduation test and is attending school.

Placement Consent Form – School-aged PL 1:
Aged 5 (enrolled in kindergarten) and aged 6 through 21

IEP Dates: from 04/10/2026 to 04/09/2027

Student Name:

DOB:

SASID:

Grade: Enrolled, completed course requirements but has not passed graduation test and is attending school.

Special Education Team – Educational Placements from: 04/10/2026 to: 04/09/2027

Corresponding Placement

The Team identified that IEP services are provided outside the general education classroom less than 21% of the time (80% inclusion).	☐ Full Inclusion Program
The Team identified that IEP services are provided outside the general education classroom at least 21% of the time, but no more than 60% of the time.	☐ Partial Inclusion Program
The Team identified that IEP services are provided outside the general education classroom for more than 60% of the time.	☐ Substantially Separate Classroom
The Team identified that all IEP services should be provided outside the general education classroom and in a public or private separate school that only serves students with disabilities.	☐ Separate Day School
The Team identified that IEP services require a 24-hour special education program.	☒ Residential School
The Team has identified a mix of IEP services that are not provided in primarily school-based settings but are in a neutral or community-based setting.	☐ Other

Parent Options/Responses

It is important that the district knows your decision as soon as possible. Please indicate your response by checking at least one (1) box and returning a signed copy to the district along with your response to the IEP. Thank you.

- ☐ I consent to the placement.
- ☐ I refuse the placement.
- ☐ I request a meeting to discuss the refused placement.

Signature of Parent, Guardian, Educational Surrogate Parent, Student 18 and Over*

SPECIAL EDUCATION SUMMARY DATA

DOE034: Educational Environment for Students Aged 5 (enrolled in Kindergarten) and aged 6-21

Residential School

5 (enrolled in Kindergarten) and aged 6 through 21 Year Olds ONLY:

- 01- Not currently a special education student age 6-21, but was previously a special education student during the current school year
- 10- Full Inclusion – special education services outside the general education classroom less than 21% of the time
- 20- Partial Inclusion – special education services outside the general education classroom 21% to 60% of the time
- 40- Substantially Separate Classroom – special education services outside the general education classroom more than 60% of the time
- 41- Public Separate Day School
- 50- Private Separate Day School
- 60- Residential School
- 70- Homebound/Hospital
- 90- Public Residential Institutional Facilities (DMH and DPH = 0370XXXX schools; DYS = 09200300; County House or Dept. of Corrections = 09200500)

For the purpose of this exercise, the total hours per week = 28 hours. This may not necessarily reflect the true hours in a school week.

Case Studies to Assist in Determining Correct Corresponding Educational Environments for DOE034

SCENARIO	DETERMINATION	CORRECT PLACEMENT
Five-year-old Maria is enrolled in kindergarten. She spends most of her day in the kindergarten classroom but is removed from the general education classroom for speech therapy and special education services for a total of two hours.	2 hours per day X 5 days = 10 hours special education outside the general education setting 10 hours / 28 total hours per week X 100 = 35.7% outside the general education classroom	20-Partial Inclusion special education services outside the general education classroom 21% to 60% of the time
For the entire school day, fourteen year-old Stacy is in a collaborative program located in a building outside the general education environment that provides educational services primarily to students with disabilities.	Stacy does not attend her local public school, but rather attends a public collaborative program in a separate school. She is there during the day and does not spend the night. She receives all her special education services in this school.	41-Public Separate Day School
The district placed Pat, age 12, at a Massachusetts Approved Private Special Education school. Though still attending this school for half of each day, he is now transitioning back to his local high school where he participates in two general education classes and one special education life skills class.	Pat's placement is at the Massachusetts Approved Private Special Education school. Even though he attends his local high school and is in the general education environment while there, his primary placement is the private separate school.	50-Private Separate Day School
Eight-year-old Raymond is a home-schooled student who is provided 4 hours per week of one-to-one occupational therapy.	4 hours receiving special education services outside the general education / 28 total hours X 100 = 14.3% outside general education	10-Full Inclusion special education services outside the general education classroom less than 21% of the time
Seventeen-year-old Tamara receives all of her core academics in a special education classroom. She participates in one elective course with her non-disabled peers for one-hour each day.	28 total hours minus 5 hours a week in general education = 23 hours receiving special education outside the general education setting	40-Substantially Separate Classroom special education services outside the general education classroom more than 60% of the time

Case Studies to Assist in Determining Correct Corresponding Educational Environments for DOE034		
SCENARIO	DETERMINATION	CORRECT PLACEMENT
	3 hours receiving special education services outside the general education / 28 total hours X 100 = 82.1% outside the general education	
Robert, age 16, has been attending his local high school where he is primarily in co-taught general education classes. Additionally, he receives 1-hour of special education services in a resource room each day. In November Robert was arrested and is now in a Department of Youth Services facility. He is expected to remain there for three months.	Any SIMS reporting that occurs prior to Robert's arrest in November would be calculated and reported according to his IEP. 5 hours receiving special education services outside the general education / 28 total hours X 100 = 17.9% outside general education. Any SIMS reporting that occurs while Robert is in the DYS facility should be reported in a public residential institutional facility.	10-Full Inclusion special education services outside the general education classroom less than 21% of the time 90-Public Residential Institutional Facilities Department of Youth Services SIMS school code = 09200300
