Re: MZ (ID: [SASID] , DOB: [DOB])

Subject: **The school district proposes the following:**

- ☐ An Evaluation
- ☒ An IEP/Amendment
- ☒ A Placement
- ☐ Other:

Notice Date: **6/25/2024**

The school district has recently discussed this student and, with your input, has developed a proposal. We have described our actions and our reasons for these actions on page two of this memo.

As you know, special education regulations provide protection to you and your child. You will find specific information about your legal rights within the *Parental Notice of Procedural Safeguards*, including sources that you may contact for help in understanding your rights. This notice is enclosed for initial evaluations. You should have received your *Parental Notice of Procedural Safeguards* on 9/12/2023 if you will be attending an IEP/Amendment or Placement meeting during this school year. We will also disseminate the notice at your request and upon disciplinary removal to an interim alternative education setting. You should carefully review this brochure and the enclosed material before making any decisions.

The school district staff is available to speak to you or meet with you about your rights and the school district's proposal. We strongly encourage you to call us if you have any questions. Please contact us through the district contact person listed below. Thank you.

An Evaluation Consent Form, an IEP or an IEP Amendment must be signed and returned, as we are required by law to have a signed copy on file regardless of your decision. Please return a copy as soon as possible but no later than the date listed below. Thank you.

Document Return Date: 7/25/2024

District Contact Person: [District Contact]

Enclosures:

- ☒ *Parental Notice of Procedural Safeguards*
- ☐ Other:

Directions to School Staff:

This notice must be sent to parents in their native language or other mode of communication used by the parent. School district must ensure that parents understand the content of this notice. (Federal Regulation §300.503)

*Describe one or more of the following actions: Initial Evaluation, Reevaluation, Emergency Evaluation, Extended Evaluation Period, IEP, IEP Amendment, Placement **(include the specific placement location and transportation requirements, if any)**. Graduation or any other proposal used to initiate or change the identification, evaluation, educational placement or the provision of special education services by answering the following questions:*

- 1. What action is the school district proposing to take?*
- 2. Why is the school district proposing to act?*
- 3. What rejected options were considered and why was each option rejected?*
- 4. What evaluation procedure, test, record or report was used as a basis for the proposed action?*
- 5. What other factors were relevant to the school district's decision?*
- 6. What next steps, if any, are recommended?*

Narrative Description of School District Proposal

The District is proposing an IEP for MZ , as well as, a PT assessment and AT Consultation.

The Team convened on 6/7/2024 for MZ 's Annual Review. Based on a review of current level of performance, the enclosed IEP was proposed to be implemented at Nashoba Learning Group in Billerica, MA.

No rejected options were considered at this time for MZ .

Findings from MZ 's most recent re-evaluation, as well as, formal and informal feedback from PSB and NLG staff were used as a basis for this proposal.

Input from MZ 's parents was also relevant to the District's decision.

Please review, sign, and return the enclosed IEP response and consent pages. If you have any questions or concerns, please do not hesitate to reach out to your OOD Coordinator or refer to the Parent Procedural Safeguards.

Administrative Data Sheet

STUDENT INFORMATION:

Full Name: MZ School ID#: [School ID] SASID: [SASID]
Birth Date: [DOB] Place of Birth: [City Redacted] Age: 11 Grade/Level: 5
Primary Language: English Language of Instruction: English
Address: [Student Address] Sex: ☒ Male ☐ Female
Home Telephone: [Phone Redacted]
If 18 or older: ☐ Acting on Own Behalf ☐ Court Appointed Guardian: _____
☐ Shared Decision-Making ☐ Delegate Decision-Making

PARENT/GUARDIAN INFORMATION:

Name: MZ's Father Relationship to Student: Father
Address: [Student Address]
Home Telephone: [Phone Redacted] Other Telephone: _____
Primary Language of parent/guardian: Mandarin Chinese / English

PARENT/GUARDIAN INFORMATION:

Name: MZ's Mother Relationship to Student: Mother
Address: [Student Address]
Home Telephone: [Phone Redacted] Other Telephone: _____
Primary Language of parent/guardian: Mandarin Chinese / English

MEETING INFORMATION:

Date of Meeting: 06/7/2024 Type of Meeting: Annual Review Meeting
Next Scheduled Annual Review Meeting: 6/6/2025 Next Scheduled Three Year Reevaluation Meeting: 2026

ASSIGNED SCHOOL INFORMATION: (Complete after a placement has been made.)

School Name: Nashoba Learning Group Telephone: 978-528-5210
Address: 170 Lexington Road, Billerica, MA 01821
Contact Person: [Clinical Director] Role: Clinical Director, BCBA Telephone: 978-528-5210
Cost-Shared Placement: ☒ No ☐ Yes If yes, specify agency: _____

After a meeting, attach to an IEP, an IEP Amendment or an Extended Evaluation Form.

School District Name: Brookline Public Schools
School District Address: 333 Washington Street Brookline, MA 02445

Individualized Education Program

IEP Dates: from 6/7/24 to 6/6/25

Student Name: MZ DOB: [DOB] ID#: [School ID] Grade/Level: 5

Parent and/or Student Concerns

What concern(s) does the parent and/or student want to see addressed in this IEP to enhance the student's education?
MZ's parent's main concern at this time is behavior. They would like that to be the main focus and to explore different strategies in order to help him self regulate. These may include different sensory strategies. They would also like to see him increase his independence especially with his self-care routines (e.g. eating and drinking). They would like to see him be able to follow a schedule that can help with his independence across his day and help him to understand the passage of time. They would also like to see him increase his independence with other self-care routines such as washing his hands when coming inside to wash off the pollen from his skin, utilize the bathroom despite being anxious, and independently take a rest on the beanbag for a short time. MZ has very few highly preferred leisure skills, so they would like to see him increase his interest in other activities as well.

Student Strengths and Key Evaluation Results Summary

What are the student's educational strengths, interest areas, significant personal attributes and personal accomplishments?
What is the student's type of disability(ies), general education performance including MCAS/district test results, achievement towards goals and lack of expected progress, if any?
MZ is a smart, curious, and affectionate eleven-year-old boy. MZ started school at NLG at the beginning of April 2024, transferring from public school in Brookline. MZ enjoys playing on the playground, specifically using the swings, playing on the slide and trampoline in the gym, and listening to music on his computer. MZ is a verbal student who needs some prompting for intelligibility and utterance length. Telling MZ to "Use a full sentence" has helped prompt those longer utterances. MZ benefits tremendously from using a visual schedule and list of expectations as well as frequent breaks to help with regulation and attending. MZ uses a low-tech "Core Board" to help with intelligibility and for self-advocacy, he can gesture to the words "go, work, help" with little to no prompting from his teachers. MZ has a lot of sensory needs and benefits from receiving many sensory breaks including deep pressure squeezes on his hands, feet, shoulders and lower back. He loves using the sensory slide and the sensory steam roller to help with regulation.
MZ has also been working on spelling and is able to spell Wait, Sorry, and Family independently but still requires some model prompts to spell Library. When answering WH questions, MZ requires prompting to begin to read a short passage, he can answer who, where, and what questions with partial verbal prompting. MZ has a robust vocabulary and has impressed his teachers with his reading skills since starting at NLG. MZ shows great ability for functional academic work adding 8 new sight words and 3 new spelling words to his repertoire. This upcoming IEP period is dedicated to nurturing MZ's academic and behavioral growth, aiming to pave the way for his continued success.

Key Evaluation Summary Results (Re-evaluation, 2023)

Academic (Brown, 2023): MZ's performance on the Brigance Inventory of Early Development III showed areas of both strengths as well as areas that he needs support in at this time. Areas of strength include book skills, blending, letter recognition and identification, beginning sounds, sight words, rote counting, matching number to quantity, shape skills, demonstrating 1:1 correspondence, number recognition and identification, sorting by attribute, and identifying weather. Areas that MZ will need support include segmenting, deletion, rhyming, identifying common signs, ordinal positions, preceding and following numbers, addition and subtraction skills, money skills, time telling, and various science skills.

Behavior (Ward, 2023):

Within the classroom setting, MZ is able to follow whole group and individual directions with prompts, remain in his work area while engaging with materials, and engage appropriately with activities. MZ demonstrates participation across specials and during group tasks within the classroom. MZ does struggle with attending to materials and directions the first time they are given. He is often looking away from materials while following prompts which increases the difficulty in mastering tasks and acquiring new skills. Additionally, MZ presents with difficulty maintaining his regulation at times, engaging in self-pinching, screaming, and crying. At these times he requires sensory input and other coping strategies to regulate.

Psychological (Mekler, 2023):

On the SB-5, each score fell within the Moderately Impaired range. Similarly, on the CTONI-2, a test that does not involve verbal language, each score fell within the Very Poor range. It was apparent that MZ was not fully attending and/or putting forth his best effort, as adults who worked closely with him were confident he would have been able to answer correctly, and it was apparent on some trials he did not closely look at the response options. Additionally, the SB-5 is scored compared to a normative sample, and scores have not been adjusted for children with autism spectrum disorder, language delays, and English Language Learners. Due to the combination of these factors, these scores are likely an underestimate of MZ's true cognitive abilities. Although these are likely not true indicators of MZ's cognitive ability, the scores are an estimate of MZ's abilities and motivation to engage in novel tasks in a novel setting with a novel person. Additionally, MZ's Team has reported that they have had difficulty finding effective reinforcers, and MZ does not always feel motivated to put forth his best effort, so his performance during testing may also be indicative of his performance during some occasions in the classroom. Overall, although MZ may not have shown his true cognitive abilities, his performance suggests that he has an easier time engaging and understanding tasks with less language components.

BASC-3 ratings yielded at-risk scores in the Attention Problems domain, indicating MZ has more difficulty than others his age focusing and sustaining attention. In school, he demonstrates more signs of hyperactivity, including difficulty sitting still and being constantly in motion, than he does at home. Neither raters indicated a concern regarding MZ's aggression, though both parent and teachers have reported MZ engages in self-injurious behavior, particularly when experiencing distress. These behaviors reportedly increased in frequency during the spring of 2022. BASC-3 ratings indicate MZ demonstrates more signs of anxiety and depression in school than he does at home. SRS-2 and BASC-3 rating scales indicate MZ demonstrates significant deficits in his social skills that are consistent with his Autism diagnosis. He has difficulty picking up on and interpreting social cues, communicating socially, and showing empathy. In terms of social motivation, MZ does not typically join group activities unless he is told to do so, and in school, he often avoids interactions with peers and adults. When under stress, MZ typically shows rigid or inflexible patterns of behavior. The Vineland-3 was administered to [Staff] and MZ's Father to gain an understanding of MZ's adaptive behavior, or behavior needed to complete daily tasks. MZ's overall level of adaptive functioning across settings, described as the Adaptive Behavior Composite, falls in the Low range, and scores in each range were also in the Low range.

Speech and Language (Shea, 2023)

Results from the formal assessments indicate that MZ's receptive vocabulary skills fell within the below average range with a standard score of 44 (0.1 percentile) on the PPVT-5. Despite a below average score, MZ was able to identify a variety of challenging words, including nouns, verbs, and descriptors, such as measuring, brain, and full. Compared to previous testing in 2020, MZ has more than doubled the number of words he was able to identify receptively. MZ's expressive vocabulary skills also fell within the below average range on the EVT-3 with a standard score of 69 (2nd percentile). MZ was able to label nouns, verbs, and descriptors such as thermometer, slowly, and eating. Compared to 2020 testing, MZ increased the number of words he was able to identify correctly by 49% in 2023. MZ was also administered three subtests from the CELF-5 in order to gather more information about his language skills. The Sentence Comprehension and Linguistic Concepts subtests were normed on children ages 5-8. Consequently, MZ was not able to receive a standard score on these subtests. MZ was able to understand simple sentences that required him to comprehend prepositions, adjectives, and key verbs. On the Linguistic Concepts subtest, he also demonstrated comprehension of the following linguistic concepts: and, together, many. On the Word Classes subtest, MZ presented with below average skills (SS:1, PR:0.1). When given visual supports, MZ was able to make connections between concrete words such as "helicopter" and "plane." This subtest indicates that MZ would benefit from expanding his understanding of categories. On the Communication Matrix, MZ demonstrated the ability to refuse objects, request an action, request an object, make choices, request attention, direct attention, show affection, greet others, answer yes/no questions, use polite social forms, name objects or people, ask questions, and make comments. MZ used a variety of communication methods to demonstrate these skills, such as gestures, low-tech AAC (e.g., topic displays), and formulating sentences aloud. MZ has shown growth in his ability to formulate longer utterances, make comments, direct attention, and has an emerging ability to ask questions.

Additional Testing Results (10/4/22, meeting):

Home Assessment (Ward, 9/2022): MZ required verbal prompting to complete routines within his home such as switching between pairs of shoes and washing his hands when entering the house. He was more independent with his morning routine, requiring lesser prompts throughout breakfast and getting ready to leave the home. MZ also showed a lack of functional engagement with activities. He moved from different rooms within the house accessing items for a short period of time. MZ remained engaged for the longest period of time while on his swing set (approx. 10 minutes). MZ did scream within the home setting. He did

not engage in self-injury, crying/whining or bolting. These behaviors are not of significant concern in regards to the purpose of this assessment.

Occupational Therapy

Sensory Profile (Perry, 6/2022): Based on the Sensory Profile School Companion 2 (completed by his teacher), MZ scores for Auditory, Visual and Touch are all within the Just Like the Majority of Others range. In terms of Movement, MZ's scores place him in the slightly More Than Others category. In terms of Behavioral, MZ scored in the Much More Than Others category. Based on the information provided on the Sensory Profile especially in the areas of Movement and Behavioral, MZ tends to interact or participate in groups less, and can be slower to join and engage in physical activities more than his same aged peers. Unexpected changes and knowing what the new expectation may be, or perhaps not understanding a physical task/activity can create "avoiding". Students with this profile benefit from being forewarned as early as possible to these type or new situations. MZ's parents also filled out the Sensory Profile Caregiver 2 Questionnaire. In regards to MZ with his sensory systems, he was identified as More Than Others for Touch and Much More Than Others for Social Emotional. Based on parent's responses, MZ was noted to frequently show distress during grooming tasks. He also has definite and predictable fears that interfere with his daily routines as well as social participation. MZ requires sensory strategies and tools implemented throughout his day in order to participate at his fullest potential in daily activities.

(LeRay, 3-23): MZ's evaluation was compiled through clinical observation due to decreased ability to follow directions of standardized fine motor and visual motor testing. MZ currently is able to write his name from memory. He uses writing aides - weighted pencil, slant board and adapted paper during handwriting tasks. MZ is able to cut with fair accuracy of straight lines. He requires prompting to use his non-working hand to stabilize paper while writing and cutting. At this time, MZ continues to present with decreased fine motor strength and coordination which impact his ability to write legibly, type proficiently and complete multi step motor activities within his classroom. He also presents with difficulty processing sensory information within his environment.

Vision Statement: What is the vision for this student?

Consider the next 1 to 5 year period when developing this statement. Beginning no later than age 14, the statement should be based on the student's preferences and interest, and should include desired outcomes in adult living, post-secondary and working environments.

We envision that MZ will maintain low levels of maladaptive behaviors (e.g. aggression and self-injurious behavior) and increase his appropriate behaviors.

We envision that MZ will increase his attending behaviors at the desk for longer periods of time in order to engage in tasks for longer durations.

We envision that MZ will be able to go into the community (i.e. stores, restaurants, grocery stores, etc.) and do so without engaging in maladaptive behaviors.

We envision that MZ will improve his expressive communication and social skills and appropriately engage with peers.

We envision that MZ will improve upon his skills related to functional academics and generalize them in the natural environment when applicable.

We envision that MZ will engage in leisure activities and maintain appropriate behavior.

We envision that MZ's activities of daily living skills improve and for him to become independent with all tasks targeted and for him to generalize learned tasks from school into the home environment (or vice versa).

IEP 1

Individualized Education Program

IEP Dates: from 6/7/24 to 6/6/25

Student Name: MZ DOB: [DOB] ID#: [School ID]

Present Levels of Educational Performance

A: General Curriculum

Check all that apply.

General curriculum area(s) affected by this student's disability(ies):

- | | |
|---|--|
| ☒ English Language Arts | Consider the language, composition, literature (including reading) and media strands. |
| ☒ History and Social Sciences | Consider the history, geography, economic and civics and government strands. |
| ☒ Science and Technology | Consider the inquiry, domains of science, technology and science, technology and human affairs strand. |
| ☒ Mathematics | Consider the number sense, patterns, relations and functions, geometry and measurement and statistics and probability strands. |
| ☒ Other Curriculum Areas | Specify: Daily Living Skills, Community Skills, OT |
-

How does the disability(ies) affect progress in the curriculum area(s)?

^{MZ} 's disability, Autism, impacts his ability to acquire skills through a typical curriculum and environment. His disability affects his communication, language development, attending, academic skills, play skills, social-emotional development, critical thinking skills, and behavior. Furthermore, due to ^{MZ} 's maladaptive behaviors that interfere with his ability for learning and socialization, he cannot readily learn from the environment of a typical classroom setting. ^{MZ} benefits from systematic teaching of skills that are broken down into small teachable steps that are initially taught in a one-to-one format. ^{MZ} requires adult support at all times in order to maintain his safety and maintain low levels of inappropriate behavior. Frequent practice and reinforcement of desired skills is necessary to increase skill acquisition and desired interaction(s).

What type(s) of accommodation, *if any*, is necessary for the student to make effective progress?

In order for ^{MZ} to make effective progress in areas of communication, social and academic skills, and to acquire behavioral control, he needs the following:

- 1:1 teacher/student ratio
 - Customized Applied Behavior Analytic instruction provided by a trained ABA therapist in a highly structured, sequential format, utilizing discrete trial instruction, incidental teaching and task analyzed instruction.
 - Structured behavior program
 - Concepts broken down into small, observable, measurable steps.
 - High levels of repetition and frequent reinforcement that is provided immediately following the desired behavior
 - Daily data collection to ensure success of teaching strategies and to monitor progress
 - Systematic generalization of skills to other adults, settings, and materials as skills are mastered
 - An effective system of reinforcement, including clear instructions and contingencies, and frequent preference assessments
 - Customized prompting and prompt fading strategies
 - A variety of sensory tools.
 - A vast sensory diet
 - Minimal distractions
 - Structured daily schedule
 - Visual to do lists with clear expectations and a clear ending point
 - Warning for upcoming transitions
 - Clear expectation of behavior and performance
 - Visuals and social stories (when applicable)
 - Give choices (when applicable)
-

What type(s) of specially designed instruction, *if any*, is necessary for the student to make effective progress?

Check the necessary instructional modification(s) and describe how such modification(s) will be made.

- | | |
|--|---|
| ☒ Content: | Content is modified to match ^{MZ} 's skill level and presented in appropriate steps at his language and cognitive level. |
| ☒ Methodology/Delivery of Instruction: | An instructional approach utilizing the principles of ABA will be used throughout ^{MZ} 's school day. Examples of strategies include, but are not limited too; precision teaching, errorless teaching, discrete trial, teaching in the natural environment/incidental, and task analyzed teaching. All procedures will utilize |

modeling, shaping, prompting (and strategies to fade prompts), visual (text and pictures) supports, social stories, and positive reinforcement to address targeted skills. New tasks, concepts, and/or programming will be taught in a one-to-one format with the intent to gradually fade supports as appropriate. Furthermore, prompts and supports will be faded for all mastered and acquired skills to promote independence. After completion of a functional assessment, individualized treatment plans will be developed for each targeted behavior. Weekly review of all mastered and previously acquired skills/programs should be conducted in order to prevent regression of skills.

- ☒ Performance Criteria: In order for MZ to meet the criteria for all of his goals and objectives, he must demonstrate approximately 80% accuracy (unless otherwise specified) across three consecutive sessions and at least two therapists .

Use multiple copies of this form as needed.

IEP 2

Individualized Education Program

IEP Dates: from 6/7/24 to 6/6/25

Student Name: MZ DOB: [DOB] ID#: [School ID]

Present Levels of Educational Performance

B: Other Educational Needs

Check all that apply.

- | | | |
|--|--|--|
| ☐ Adapted physical education | ☐ Assistive tech devices/services | ☒ Behavior |
| ☐ Braille needs (blind/visually impaired) | ☒ Communication (all students) | ☐ Communication (deaf/hard of hearing students) |

Age-Specific Considerations

- ☐ For children ages 3 to 5 — participation in appropriate activities
- ☐ For children ages 14+ (or younger if appropriate) — student's course of study
- ☐ For children ages 16 (or younger if appropriate) to 22 — transition to post-school activities including community experiences, employment objectives, other post school adult living and, if appropriate, daily living skills

How does the disability(ies) affect progress in the indicated area(s) of other educational needs?

MZ 's disabilities of autism affect progress in all curriculum areas indicated above in the following ways:

MZ 's maladaptive behaviors interfere with his ability to learn and socialize in a typical classroom setting. MZ benefits from systematic teaching of skills that are broken down into small teachable steps that are initially taught in a one-to-one format. MZ requires adult support at all times in order to maintain his safety and maintain low levels of inappropriate behavior. Frequent practice and reinforcement of desired skills is necessary to increase skill acquisition and desired interaction(s) outcomes.

MZ 's delays related to his inability to regulate and modulate his reactions to sensory stimuli and internal stimuli impact his ability to focus and attend to any tasks for long periods of time.

MZ 's delays in receptive, expressive, and pragmatic language skills secondary to his autism spectrum disorder impact his ability to attend to, process, recall, and respond to grade/age level language. These delays effect his ability to comprehend concepts, spoken sentences, and directions of increasing length and complexity. These delays would further affect his ability to listen to age appropriate stories/events and follow through with complex directions. MZ 's delays related to his expressive language skills are reflected in communicating beyond expressing his basic wants/needs, understanding and utilizing vocabulary words and concepts, and answering more abstract questions. These noted challenges impact MZ 's ability to respond to questions, use language effectively, and impact his ability to maintain expanded conversations with others.

MZ 's cognitive delays, as well as previously mentioned factors, all impact the rate in which he acquires new skills, consistency in demonstration of learned skills, and the generalization of new skills across novel tasks and different settings/environments, in all curriculum areas.

What type(s) of accommodation, *if any*, is necessary for the student to make effective progress?

In order for MZ to make effective progress in areas of communication, social and academic skills, and to acquire behavioral control, he needs the following:

- 1:1 teacher/student ratio
- Customized Applied Behavior Analytic instruction provided by a trained ABA therapist in a highly structured, sequential format, utilizing discrete trial instruction, incidental teaching and task analyzed instruction.
- Structured behavior program
- Concepts broken down into small, observable, measurable steps.
- High levels of repetition and frequent reinforcement that is provided immediately following the desired behavior
- Daily data collection to ensure success of teaching strategies and to monitor progress
- Systematic generalization of skills to other adults, settings, and materials as skills are mastered
- An effective system of reinforcement, including clear instructions and contingencies, and frequent preference assessments
- Customized prompting and prompt fading strategies
- A variety of sensory tools.
- A vast sensory diet

- Minimize distractions
- Predicable daily routine, visually presented
- Warning for upcoming transitions
- Clear expectation of behavior and performance
- Visuals and social stories (when applicable)
- Give choices (when applicable)

What type(s) of specially designed instruction, *if any*, is necessary for the student to make effective progress?

Check the necessary instructional modification(s) and describe how such modification(s) will be made.

- ☒ Content: Content is modified to match MZ 's skill level and presented in appropriate steps at his language and cognitive level.
- ☒ Methodology/Delivery of Instruction: An instructional approach utilizing the principles of ABA will be used throughout MZ 's school day. Examples of strategies include, but are not limited too; precision teaching, errorless teaching, discrete trial, teaching in the natural environment/incidental, and task analyzed teaching. All procedures will utilize modeling, shaping, prompting (and strategies to fade prompts), visual (text and pictures) supports, social stories, and positive reinforcement to address targeted skills. New tasks, concepts, and/or programming will be taught in a one-to-one format with the intent to gradually fade supports as appropriate. Furthermore, prompts and supports will be faded for all mastered and acquired skills to promote independence. After completion of a functional assessment, individualized treatment plans will be developed for each targeted behavior. Weekly review of all mastered and previously acquired skills/programs should be conducted in order to prevent regression of skills.
- ☒ Performance Criteria: In order for MZ to meet the criteria for all of his goals and objectives, he must demonstrate approximately 80% accuracy (unless otherwise specified) across three consecutive sessions and at least two therapists.

Use multiple copies of this form as needed.

IEP 3

Individualized Education Program

IEP Dates: from 6/7/24 to 6/6/25

Student Name: MZ DOB: [DOB] ID#: [School ID]

Current Performance Levels/Measurable Annual Goals

Goal # 1	Specific Goal Focus: Behavior
----------	-------------------------------

Current Performance Level: What can the student currently do?

MZ has been making progress on reducing maladaptive behaviors since starting here at Nashoba Learning Group. The behaviors we have been tracking include aggression, screaming, and self-injurious behavior (SIB). He is engaging an average of 6 instances of aggression per day. He is engaging in an average of 1.45 instances per day of screaming and he is engaging in an average of 2.75 instances of self-injury per day. MZ engages in these behaviors most often when transitioning from preferred activities, when denied access to an item or activity, in a heightened state of arousal (egg silly, anxious, angry) and around unfamiliar people. Over the next IEP period, we hope to increase his functional communication repertoire as well as find functional alternatives to these problem behaviors.

Measurable Annual Goal: What challenging, yet attainable, goal can we expect the student to meet by the end of this IEP period?
How will we know that the student has reached this goal?

MZ will decrease the frequency in which he engages in aggression and self-injury. He will also increase appropriate and alternative behaviors through the following objectives identified below.

Benchmark/Objectives: What will the student need to do to complete this goal?

1.01 Aggression - MZ will reduce the number of instances of aggression (e.g. pinching, slapping, etc.) from an average of 6 per day to an average of 2 or less per day.

1.02 Self-Injury - MZ will reduce the number of instances of self-injury from an average of 2.75 per day to an average of 1 or less per day.

1.03 Attending - MZ will refrain from engaging in disruptive vocalizations during work tasks for up to 5 minutes in 80% of work sessions.

1.04 Silly Episodes- MZ will reduce the number of "silly episodes" he engages in to no more than 3 episodes a day.

1.05 Functional communication - MZ will utilize at least two new functional communication phrases (e.g. "thank you", "excuse me", "help please", etc.) in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

1.06 Self-Advocacy - MZ will utilize at least two new phrases (e.g. "leave me alone", "I need space", "I need a break", "I want something different", "I don't like that", etc.) in order to advocate for himself in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

1.07 Calming Strategies/Coping Skills - MZ will match at least one behavior to engage in to at least 2 emotions (e.g. "take a deep breath" and "squeeze a pillow" when mad or "ask for space" when sad etc.) in 80% of opportunities across 3 consecutive sessions and at least 2 therapists. typos?

1.08 Waiting - MZ will wait for up to 3 minutes for a preferred activity, item, or location with no more than 2 maladaptive behaviors (e.g. aggression, SIB).

1.09 Perseverations - While doing a 5 minute work session at the desk, MZ will request a preferred activity no more than 2 times with the use of visual supports.

1.10 Safe/ Unsafe - MZ will expressively label safe and unsafe behavior with the use of a sorting board in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

Goal # 2	Specific Goal Focus: Social and Communication
----------	---

Current Performance Level: What can the student currently do?

MZ is a verbal communicator who requires some prompting for utterance length and intelligibility. Since starting at Nashoba Learning Group we have introduced a pacing board to help reduce his speed and increase intelligibility. The team has been able to fade the visual and can gesture to their hands to remind MZ to speak more slowly. MZ still needs some gestural

prompting from his teacher to respond to greetings and departures, saying “hello” independently 42% of all trials and saying “goodbye” independently in 58% of all trials. MZ uses a low-tech “Core Board” to help with intelligibility and for self-advocacy. He can gesture to the words “go, work, help” with little to no prompting from his teachers. MZ has been working on identifying emotions and can label happy with 75% independence and sad with 70% independence. He requires gestural and verbal prompting to identify tired, sick, and angry. For this upcoming IEP period, the team will focus on communication through conversations, emotions, pro-social skills, and speech clarification.

Measurable Annual Goal: What challenging, yet attainable, goal can we expect the student to meet by the end of this IEP period?
How will we know that the student has reached this goal?

MZ will continue to improve his social skills and enhance his communication skills as measured through the following objectives. All require at least 80% independent responding across two therapists and two days, unless otherwise stated in the objective.

Benchmark/Objectives: What will the student need to do to complete this goal?

- 2.01 Emotions - MZ will expressively label three emotions of others in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.
- 2.02 Conversations - Using visual supports, MZ will have a conversation with a familiar communication partner with appropriate body orientation to include a greeting, responding to 1 question, and a departure statement in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.
- 2.03 People ID Rec - MZ will receptively identify 5 familiar people in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.
- 2.04 People ID Exp- MZ will expressively label 5 familiar people in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.
- 2.05 Peer Interactions - During an activity with a peer(s), with the use of visual supports, MZ will have at least 2 appropriate exchanges with a peer(s) in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.
- 2.06 Pro-social Skills - MZ will add 2 new pro-social skills to his repertoire (e.g. saying “bless you” when someone sneezes, holding the door, picking up something someone dropped, asking someone if they need something etc.) in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.
- 2.07 Soliciting Attention - When provided with a visual cue, MZ will say “Excuse me” and/or a person’s name in order to gain their attention in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.
- 2.08 Event Recall - With the use of visual supports, MZ will recall at least 2 events from his day in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.
- 2.09 Clarifying - When MZ’s message is not understood by his communication partner, he will employ a repair strategy utilizing visual supports in 50% of opportunities across 3 consecutive sessions and at least 2 therapists.
- 2.10 Social Questions- MZ will add five new social questions to his repertoire (e.g. DOB/ Sister’s name/ disability, etc.) with 80% accuracy across 3 consecutive sessions and at least 2 therapists.
- 2.11 Gaining Information- With visual supports, when MZ is seeking more information about an event or item, he will utilize one new “wh” question in order to ask for that information (e.g. “where is the ___?” or “when are we going to ___?”) with 80% accuracy across 3 consecutive sessions and 2 therapists.

Progress Reports are required to be sent to parents at least as often as parents are informed of their nondisabled children’s progress. Each progress report must answer the following two questions for each goal:

1. What is the student’s progress toward the annual goal?
2. Is the progress sufficient to enable the student to achieve the annual goal by the end of the IEP period?

Use multiple copies of this form as needed.

IEP 4-1

Individualized Education Program

IEP Dates: from _____ to 6/6/25

Student Name: MZ _____ DOB: [DOB] _____ ID#: [School ID] _____

Current Performance Levels/Measurable Annual Goals

Goal # 3	Specific Goal Focus: English Language Arts
----------	--

Current Performance Level: What can the student currently do?

MZ has a robust vocabulary and can identify most words from the first fry 100 list and other functional vocabulary words introduced with 85% accuracy. When probing new sight words, the team identified some words he struggled with and over the past two months he has added eight new sight words to his repertoire (these, other, could, fish, window, family, picture). MZ has also been working on spelling and is able to spell Wait, Sorry, and Family independently, but still requires some model prompts to spell Library. When answering WH questions, MZ requires prompting to begin to read a short passage. He is able to answer who, where, and what questions with 65% independence. For this upcoming IEP period, the team wishes to focus on improving MZ's ability to recall information from longer passages and increased independence when answering WH questions.

Measurable Annual Goal: What challenging, yet attainable, goal can we expect the student to meet by the end of this IEP period?
How will we know that the student has reached this goal?

MZ will improve his english language artsM skills through achievement of the following objectives. All require at least 80% accuracy across at least 3 consecutive sessions with at least two therapists unless otherwise indicated in the objective.

Benchmark/Objectives: What will the student need to do to complete this goal?

3.01 Vocabulary Receptive - MZ will receptively identify 10 new items in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

3.02 Vocabulary Expressive - MZ will expressively label 10 new items in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

3.03 Following Directions - MZ will follow oral and/or written 1-3 step directions in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

3.04 Reading Comprehension - Based on a reading activity of 2-4 sentences, MZ will answer WH questions in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

3.05 Sentence Structure - Using visual supports, when given a picture of a scene, MZ will create a sentence using at least one subject and verb in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

3.06 Spelling - MZ will add 10 new spelling words to his repertoire in 80% of opportunities across 3 consecutive sessions and at least 2 therapists

3.07 Features Receptive - MZ will receptively identify 3 new features of items/ objects in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

3.08 Features Expressive - MZ will expressively label 3 new features of items/objects in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

3.09 Functions Receptive - MZ will receptively identify new functions of items/objects in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

3.10 Functions Expressive - MZ will expressively label 3 new functions of items/objects in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

3.11 Sequencing - MZ will put pictures of a story in order of first, next, and last and describe the sequence expressively in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

3.12 Prepositions - With visual supports, MZ will follow a direction to place an item in relation to another item for 5 new prepositions in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

Goal # 4	Specific Goal Focus: Math and Science
----------	---------------------------------------

Current Performance Level: What can the student currently do?

^{MZ} can identify and transcribe numbers up to 20 independently and is able to reach up to 30 with some prompting from his teachers. ^{MZ} can use manipulatives to add to a sum of 10 with little to no prompting to his teachers but requires gestural prompts to reach sums higher than 10. ^{MZ} is able to use a calculator to solve simple addition and subtraction equations and then transcribe the answers. ^{MZ} can accurately identify when it's sunny or rainy when looking out the window to observe the weather. He is able to recognize needing to wear a jacket when it is raining. Probing visuals of snowy weather prompted ^{MZ} to identify it was snowing, but he struggled with determining what kind of clothes are needed for snowy weather. When looking at a calendar, ^{MZ} can specify the month and date but struggles with finding the corresponding day of the week. ^{MZ} can expressively and receptively identify all months of the year, their order, the days of the week, and their order.

Measurable Annual Goal: What challenging, yet attainable, goal can we expect the student to meet by the end of this IEP period?
How will we know that the student has reached this goal?

^{MZ} will improve his mathematics and science skills through achievement of the following objectives. All require at least 80% accuracy across at least 3 consecutive sessions with at least two therapists unless otherwise indicated in the objective.

Benchmark/Objectives: What will the student need to do to complete this goal?

4.01 Time Telling- Across 2 therapists, ^{MZ} will match a written time for the whole, half, and quarter hours to an analog and/or a digital clock with 80% accuracy across three consecutive sessions.

4.02 Addition - ^{MZ} will solve addition problems using manipulatives to a sum of 20 in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

4.03 Subtraction - ^{MZ} will solve subtraction problems using manipulatives with visual supports from a sum of 20 in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

4.04 Calculator Use - ^{MZ} will solve simple single or double digit addition/subtraction equations using a calculator in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

4.05 Math Concepts - ^{MZ} will add 2 new math concepts to his repertoire (e.g. more/less, whole/half, etc.) in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

4.06 Math Vocabulary - ^{MZ} will match 3 new math terms with their symbols. (e.g. +, -, =, x) in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

4.07 Skip Counting - With the use of visual supports, ^{MZ} will skip count by 2's up to 20, 5's up 50, 10's up to 100, and 25's up to 100, with 80% accuracy across 3 consecutive sessions with at least 2 therapists.

4.08 Purchasing - Using visual supports, ^{MZ} will make mock or real purchases with the use of bills up to \$10 in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

4.09 Money Skills - ^{MZ} will receptively identify and expressively label the name and value for a penny, nickel, dime, quarter, and dollar bill in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

4.10 Weather - ^{MZ} will check the weather through the window or through a weather application and identify the appropriate clothing to wear in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

4.11 Calendar- ^{MZ} will identify parts of a calendar and respond to questions pertaining to a monthly calendar in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

Progress Reports are required to be sent to parents at least as often as parents are informed of their nondisabled children's progress. Each progress report must answer the following two questions for each goal:

3. What is the student's progress toward the annual goal?
4. Is the progress sufficient to enable the student to achieve the annual goal by the end of the IEP period?

Use multiple copies of this form as needed.

IEP 4-2

Individualized Education Program

IEP Dates: from 6/7/24 to 6/6/25

Student Name: MZ DOB: [DOB] ID#: [School ID]

Current Performance Levels/Measurable Annual Goals

Goal # 5	Specific Goal Focus: Daily Living Skills
----------	--

Current Performance Level: What can the student currently do?

Since starting at NLG, MZ has been working on unpacking in the morning, packing up in the afternoon, and following the steps of a task analysis to wash his hands. When unpacking in the morning, MZ can hang up his backpack and coat and bring his belongings to the classroom with support from his teacher. When packing up in the afternoon MZ can place his lunch items in his lunch box, grab his homelog, and put it in his backpack with 70% independence. MZ is able to follow the steps of a handwashing task analysis with 66% accuracy and verbal prompting from his teacher to wash and dry thoroughly. At MZ's previous placement, eating lunch was a struggle due to anxiety. Since starting at NLG, MZ has felt more comfortable to eat his lunch and snack at his desk instead of in a shared lunchroom. MZ eats his lunch and shows the ability to use utensils but requires a few reminders to use the utensils. Due to MZ's intense anxiety surrounding unfamiliar people and places, going to the school nurse has not been easy. During this IEP period, we will focus on building his mealtime behavior skills and medical tolerance as he feels less anxiety. The team will also focus on community, safety skills, and hygiene routine.

Measurable Annual Goal: What challenging, yet attainable, goal can we expect the student to meet by the end of this IEP period?
How will we know that the student has reached this goal?

MZ will continue to improve his daily living skills as measured through the following objectives. All require at least 80% independent responding across two therapists and two days, unless otherwise stated in the objectives.

Benchmark/Objectives: What will the student need to do to complete this goal?

5.01 Meal Prep -With visual supports, MZ will follow the steps of a TA to make simple recipes that include pouring mixing and/or microwaving ingredients in 80% of opportunities across 3 consecutive sessions and at least 2 therapists

5.02 Meal Time Behavior - During meal times, MZ will utilize appropriate table manners (eg, sitting with feet on the floor, head off the desk, using utensils) in 60% of opportunities across 3 consecutive sessions and at least 2 therapists.

5.03 Personal Belongings - Utilizing visual supports, MZ will place his personal items (hat, mittens, goggles, fidgets etc) in the designated places in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

5.04 Morning Routine (unpacking) - Each morning, MZ will follow the steps of an unpacking task analysis using no more than 1 redirect in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

5.05 Afternoon Routine - At the end of each day, MZ will follow the given steps of a packing up task analysis using no more than 1 redirect in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

5.06 Hygiene Routine - Using visual support, MZ will follow the steps of a simple hygiene routine consisting of at least 2 tasks in 80% of opportunities across 3 consecutive sessions and at least 2 therapists..

5.07 Leisure Skill Exposure - MZ will engage in 1 new leisure activity per quarter without engaging in maladaptive behaviors.

5.08 Safety Skills - In a contrived setting, MZ will add 3 new safety skills to his repertoire by following safety demands (e.g. stop, come here, follow me) in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

5.09 Safety Signs - MZ will add three new safety signs to his repertoire by expressively labeling them and stating what to do when he encounters each sign in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

5.10 First Aid - MZ will demonstrate the understanding of different relationships between pain and solutions for pain (e.g. bleeding & bandaids, headaches & medicine, etc.) for a minimum of 3 different solutions in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

5.11 Community Helpers - MZ will expressively label and receptively identify 5 new community helpers by job title and identify their job descriptions (e.g. police officer, fire fighter, nurse, etc.) in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

5.12 Community Safety- MZ will refrain from engaging in maladaptive behaviors (aggression, bolting, sib) when visiting different locations (store, park, etc.) in 80% of opportunities across 3 consecutive sessions and at least two therapists.

5.13 Medical toleration: ^{MZ} will enter the nurses office and greet the nurse without the presence of challenging behaviors in 80% of opportunities across 3 consecutive sessions and at least 2 therapists.

5.14 Health and Self-Care- ^{MZ} will complete 3 lessons related to puberty and/or self-care with 80% accuracy across at least 2 therapists.

5.15 Activity Schedule- With visual supports and no more than 3 redirects, ^{MZ} will follow an activity schedule consisting of at least 3 tasks one of which requires him to set a timer to a specific amount of time, start it, and turn it off across 3 consecutive sessions and at least 2 therapists.

Goal # 6	Specific Goal Focus: OT
----------	-------------------------

Current Performance Level: What can the student currently do?

^{MZ} is an 11.2 year old male student, new to Nashoba Learning Group as of March 2024. He requires support when anxious to use appropriate coping tools and engage in calming sensory activities to improve his arousal level. Calming tools ^{MZ} currently accesses include a hat and gloves, a bean bag, a hand massager, a finger massager, calm music, lights dimmed, and co-regulation strategies from his teachers to promote deep breathing.

^{MZ} is right hand dominant and uses a functional tripod grasp with a lateral thumb wrap to hold a standard writing utensil. He stabilizes paper independently with his left hand. He is able to write personal information such as his name and birthday with a model, however he writes at a fast pace which results in large size and reduced legibility. When typing he demonstrates appropriate bilateral coordination with a hunt and peck method for key selection. He is able to type his name and birthday from a model with fair accuracy while regulated.

^{MZ} presents with upper extremity weakness and would benefit from exploring hand and arm exercises to promote functional strength and endurance for prolonged purposeful activity engagement. He currently shows weakness when carrying school supplies including his backpack and lunch box.

Measurable Annual Goal: What challenging, yet attainable, goal can we expect the student to meet by the end of this IEP period?
How will we know that the student has reached this goal?

^{MZ} will demonstrate improvement in fine motor skills, visual motor integration, upper extremity endurance and self-regulation, to facilitate increased success in academics, ADLs and purposeful leisure interests, as evidenced by his achievement of the following objectives.

Benchmark/Objectives: What will the student need to do to complete this goal?

6.01 Calming Sensory Routine: ^{MZ} will complete a calming sensory routine, with adult direction and an appropriate arousal level, 3 times per day.

6.02 Name: With use of visual supports, ^{MZ} will write his name, legible for an unfamiliar reader in 80% of opportunities.

6.03 DOB: With use of visual supports, ^{MZ} will write his DOB, legible for an unfamiliar reader in 80% of opportunities.

6.04 Typing: ^{MZ} will type a list of functional items (e.g. personal information, social questions, groceries, etc.), copying from a model, with 80% accuracy.

6.05 Hand/Upper Extremity Strength: ^{MZ} will complete an upper extremity strengthening routine consisting of 5 exercises for 10 repetitions each, selecting exercises from a list of options, with 1 rest break between each exercise in 80% of opportunities.

6.06 Crafting: ^{MZ} will complete a multi-media craft, following a written checklist, accurately creating the product in 80% of opportunities.

Progress Reports are required to be sent to parents at least as often as parents are informed of their nondisabled children's progress. Each progress report must answer the following two questions for each goal:	5. What is the student's progress toward the annual goal?
	6. Is the progress sufficient to enable the student to achieve the annual goal by the end of the IEP period?

Use multiple copies of this form as needed.

IEP 4-5

Individualized Education Program

IEP Dates: from 6/7/24 to 6/6/25

Student Name: MZ DOB: [DOB] ID#: [School ID]

Service Delivery

What are the total service delivery needs of this student?

Include services, related services, program modifications and supports (including positive behavioral supports, school personnel and/or parent training/supports). Services should assist the student in reaching IEP goals, to be involved and progress in the general curriculum, to participate in extracurricular/nonacademic activities and to allow the student to participate with nondisabled students while working towards IEP goals.

School District Cycle: ☒ 5 day cycle ☐ 6 day cycle ☐ 10 day cycle ☐ other:

A. Consultation (Indirect Services to School Personnel and Parents)

Focus on Goal #	Type of Service	Type of Personnel	Frequency and Duration/Per Cycle	Start Date	End Date
1-5	Speech and Language	SLP	60 minutes/month	6/7/24	6/6/25
5,6	Occupational Therapy	OT	60 minutes/month	6/7/24	6/6/25
All	Supervision/Program monitoring	Clinical director, case manager, BCBA, or SPED	6 hours/month	6/7/24	6/6/25
All	Clinic Meeting	Clinical director, case manager, BCBA, or SPED	2 hours/month	6/7/24	6/6/25

B. Special Education and Related Services in General Education Classroom (Direct Service)

Focus on Goal #	Type of Service	Type of Personnel	Frequency and Duration/Per Cycle	Start Date	End Date

C. Special Education and Related Services in Other Settings (Direct Service)

Focus on Goal #	Type of Service	Type of Personnel	Frequency and Duration/Per Cycle	Start Date	End Date
All	ABA Therapy	Trained ABA therapist	30 hours per week	6/7/24	6/6/25

Use multiple copies of this form as needed.

Individualized Education Program

IEP Dates: from 6/7/24 to 6/6/25

Student Name: MZ

DOB: [DOB]

ID#: [School ID]

Nonparticipation Justification

Is the student removed from the general education classroom at any time? (Refer to IEP 5—Service Delivery, Section C.)

☐ No ☒ Yes If yes, why is removal considered critical to the student's program?

MZ requires intensive intervention using the techniques of ABA performed by trained ABA therapists overseen by a behavior specialist in order to make effective progress.

IDEA 2004 Regulation 20 U.S.C. §612 (a) (5).550: "... removal of children with disabilities from the regular educational environment occurs only when the nature or severity of the disability of a child is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily." (Emphasis added.)

Schedule Modification

Shorter: Does this student require a *shorter school day or shorter school year*?

☒ No ☐ Yes — shorter day ☐ Yes — shorter year If yes, answer the questions below.

Longer: Does this student require a longer school day or a longer school year to prevent substantial loss of previously learned skills and / or substantial difficulty in relearning skills?

☐ No ☐ Yes — longer day ☒ Yes — longer year If yes, answer the questions below.

How will the student's schedule be modified? Why is this schedule modification being recommended?

If a longer day or year is recommended, how will the school district coordinate services across program components?

In order to prevent substantial regression, MZ requires an extended year academic program and will receive extended year. NLG is currently in session 224 days a year.

Transportation Services

Does the student require transportation as a result of the disability(ies)?

☐ No Regular transportation will be provided in the same manner as it would be provided for students without disabilities. If the child is placed away from the local school, transportation will be provided.

☒ Yes Special transportation will be provided in the following manner:

☒ on a regular transportation vehicle with the following modifications and/or specialized equipment and precautions:

☐ on a special transportation vehicle with the following modifications and/or specialized equipment and precautions:

After the team makes a transportation decision and after a placement decision has been made, a parent may choose to provide transportation and may be eligible for reimbursement under certain circumstances. Any parent who plans to transport their child to school should notify the school district contact person.

Individualized Education Program

IEP Dates: from 6/7/24 to 6/6/25

Student Name: MZ

DOB: [DOB]

ID#: [School ID]

State or District-Wide Assessment

Identify state or district-wide assessments planned during this IEP period:

Grade 5 MCAS

Fill out the table below. Consider any state or district-wide assessment to be administered during the time span covered by this IEP. For each content area, identify the student's assessment participation status by putting an "X" in the corresponding box for column 1, 2, or 3.

	1. Assessment participation: Student participates in on-demand testing under routine conditions in this content area.	2. Assessment participation: Student participates in on-demand testing with accommodations in this content area. (See 1 below)	3. Assessment participation: Student participates in alternate assessment in this content area. (See 2 below)
CONTENT AREAS	COLUMN 1	COLUMN 2	COLUMN 3
English Language Arts	☐	☒	☐
History and Social Sciences	☐	☐	☐
Mathematics	☐	☒	☐
Science and Technology	☐	☒	☐
Reading	☐	☐	☐

1 For each content area identified by an X in the column 2 above: note in the space below, the content area and describe the accommodations necessary for participation in the on-demand testing. Any accommodations used for assessment purposes should be closely modeled on the accommodations that are provided to the student as part of his/her instructional program.

MZ will take the 5th grade MCAS test with accommodations for Science and Technology, English Language Arts, and Mathematics

MCAS Accommodations:

A5 Human read-aloud- Mathematics and Science and Technology

DF2 Individual (one-to-one) test administration (Student must be tested in a separate setting.)

DF3 Frequent supervised breaks

DF4 Separate or alternate test location

DF8 Familiar test administrator

DF11 "Stop Testing" policy: The student should be given the opportunity to attempt each test session. If the student does not appear to be responding to test questions after a period of 15–20 minutes, the test administrator may ask if the student is finished. If so, the test administrator may collect the student's test materials and the student can either sit quietly or be excused from the test setting.

EL5 Read aloud, repeat, or clarify general administration directions

SA 1.2 The human read-aloud

SA3.1 Scribe for ELA Tests

SA4 Calculation Device or other Mathematics Tool

UF11 Test administrator redirects student's attention to the test

2 For each content area identified by an X in column 3 above: note in the space below, the content area, why the on-demand assessment is not appropriate and how that content area will be alternately assessed. Make sure to include the learning standards that will be addressed in each content area, the recommended assessment method(s) and the recommended evaluation and reporting method(s) for the student's performance on the alternate assessment.

NOTE

When state model(s) for alternate assessment are adopted, the district may enter use of state model(s) for how content area(s) will be assessed.

IEP 7

**Individualized Education Program** IEP Dates: from 6/7/24 to 6/6/25Student Name: Zha, Max DOB: [DOB] 1013094**Additional Information**

Include the following transition information: the anticipated graduation date; a statement of interagency responsibilities or needed linkages; the discussion of transfer of rights at least one year before age of majority; and a recommendation for Chapter 688 Referral.

Document efforts to obtain participation if a parent and if student did not attend meeting or provide input.

Record other relevant IEP information not previously stated.

Clinic Meetings (2 hours in length), that include family, lead therapist, and clinical director, are offered following 4 weeks of data collection in order to review current data and programming concerns. These meeting will occur virtually until NLG administration deems it safe to hold in person meetings.

A monthly home consult (up to 1 hour) is offered each month, during school hours, per parent/guardian request. (see parent handbook).

Discussed as part of the TEAM meeting and addressed in the IEP:

- 1) Verbal and nonverbal communication needs
- 2) the need to develop social interaction skills and proficiency
- 3) the needs resulting from unusual responses to sensory experiences
- 4) the needs resulting from resistance to environmental changes or changes in daily routines
- 5) the needs resulting from engagement in repetitive activities and stereotyped movements
- 6) the need for any positive behavioral interventions, strategies and supports to address any behavioral difficulties resulting from ASD
- 7) bullying, teasing and self-advocacy
- 8) other needs resulting from the disability that impact progress in the general education classroom

A Behavior Support Plan is implemented and supervised by a Board Certified Behavior Analyst

Response Section

I certify that the goals in this IEP are those recommended by the Team and that the indicated services will be provided.

Jun-25-2024

Signature and Role of LEA Representative

Date

It is important that the district knows your decision as soon as possible. Please indicate your response by checking at least one (1) box and returning a signed copy to the district. Thank you.

☐ I accept the IEP as developed. ☐ I reject the IEP as developed.

☐ I reject the following portions of the IEP with the understanding that any portion(s) that I do not reject will be considered accepted and implemented immediately. Rejected portions are as follows:

☐ I request a meeting to discuss the rejected IEP or rejected portion(s).

Signature of Parent, Guardian, Educational Surrogate Parent, Student 18 and Over*

Date

* Required signature once a student reaches 18 unless there is a court appointed guardian.

Parent Comment: I would like to make the following comment(s) but realize any comment(s) made that suggest changes to the proposed IEP will not be implemented unless the IEP is amended.

The Team identified that IEP services are provided outside the general education classroom at least 21% of the time, but no more than 60% of the time.	☐ Partial Inclusion Program
The Team identified that IEP services are provided outside the general education classroom for more than 60% of the time.	☐ Substantially Separate Classroom
The Team identified that all IEP services should be provided outside the general education classroom and in a public or private separate school that only serves students with disabilities.	☒ Separate Day School ☐ Public or ☒ Private
The Team identified that IEP services require a 24-hour special education program.	☐ Residential School
The Team has identified a mix of IEP services that are not provided in primarily school-based settings but are in a neutral or community-based setting.	☐ Other:

Parent Options / Responses

It is important that the district knows your decision as soon as possible. Please indicate your response by checking at least one (1) box and returning a signed copy to the district along with your response to the IEP. Thank you.

- ☐ I consent to the placement.
- ☐ I refuse the placement.
- ☐ I request a meeting to discuss the refused placement.
